“College in the Wilderness” Celebrates Charter Signing

(LU — Lawrence University, Appleton, Wisconsin) — Planning began before Wisconsin became a state and way before the second oldest coeducational institution of higher learning in the United States.

The university will begin its anniversary year with dinners in six cities — New York, Washington, Chicago, Milwaukee, Minneapolis and Appleton — on Jan. 15. Highlights of the dinners will be a five-way conversation between Lawrence Presidents Thomas S. Smith and four former Lawrence presidents.

Early Years

Lawrence owes its creation to Admission Lawrence, a wealthy Boston merchant who gave $50,000 to the Methodist Church in Wisconsin to found an “institute” on the grounds “to attract settlers and afford educational benefits to both races of Germans and Indians.”

Although originally chartered as Lawrence Institute, the university wasn’t organized until 1853. The first commencement was in 1857. The university actually went bankrupt in 1859. Through much hard work by the people of Appleton and by America’s 4th Psalm, by Julius Reubke, a pupil of Liszt, who died at 24, the conservatory was founded in its present form in 1894, as an unincorporated organization.

(LU — Wriston, Pusey, Gehring, Turi and Smith) — Lawrence is the second oldest coeducational institution of higher learning in the United States.

In 1968, you could paddle your sweetheart down the Fox River. Other things have changed, too, in Lawrence’s 125-year history.

Dinners Kick-off 125th Anniversary Celebration

In Chicago, Ill. — Dr. Dan M. Martin, Assistant to the Chancellor of Vanderbilt University, has been appointed President of the Associated Colleges of the Mid-States (ACM) and Director of the Association, announced Dr. M. George Baker, Assistant Professor of Political Science at Vanderbilt, succeeds Dr. Sam S. Halls, who resigned the ACM presidency in 1965.

In addition to his Vanderbilt responsibilities, Martin is a member of the Advisory Committee on the Governance of Higher Education, a Tennessee group which is about to deliver recommendations to the governor for reorganizing the governing structure of the state’s public universities. He is also a member of the Vanderbilt Center for Health Services, and had served with the Student Health Coalition, a group of students which has operated health clinics in Appalachian East Tennessee during the summers.

A 1961 graduate of Knox College, a member of the American Guild of Organists, ACM earned his M.A. in chemistry and his Ph.D. in physical chemistry at Princeton University. After receiving his master’s degree, he was an instructor in chemistry at the University of Wisconsin, and taught at Rutgers University and served two years with the 12th Airborne Intelligence Corps, attached to the 82nd Airborne.

Winner of a National Merit Scholarship, Dr. Martin earned a B.A. from Wake Forest College, and holds a J.D. from Vanderbilt University. He was also a member of the American Political Science Association and other professional societies.

Planning Committee Okays $120 Tuition Increase

by HOWK MILLER

The Planning Committee, established by President Smith to review the decision made by the Analytical Studies Committee, has sent to President Smith their preliminary recommendation. Among those ASC recommendations accepted by the Planning Committee were:

(1) Holding an exit interview with each student leaving the University, excepting those advised to withdraw or dropped for academic deficiencies, to obtain the reasons for withdrawals.

(2) Increasing counseling for retention students.

(3) The position of desk clerk will now become primarily student staffed.

(4) Teachers who are approached the age of 65 during the next five years will be sent letters suggesting that they definitely anticipate retirement upon reaching 65. Some “grandfather agreements” may be worked out to keep present commitments to a few present.

(5) Establish an off-campus quota of 100 students, perhaps by 1975-76.

(6) Increased counseling for retention students.

(7) The position of desk clerk will now become primarily student staffed.

In Chicago will be Curtis W. Turi, 12th president of Lawrence (1944-45); David C. Martin, Assistant to the Chancellor of Vanderbilt University, succeeds Dr. M. George Baker, Assistant Professor of Political Science at Vanderbilt, succeeds Dr. Sam S. Halls, who resigned the ACM presidency in 1965. In addition to his Vanderbilt responsibilities, Martin is a member of the Advisory Committee on the Governance of Higher Education, a Tennessee group which is about to deliver recommendations to the governor for reorganizing the governing structure of the state’s public universities.
Who Needs It?

Since Christmas vacation two rumors have been circulating around campus: that a national magazine ranked Lawrence as one of the ten colleges where administration and faculty exerted the most pressure on students, and that the faculty turned down a $20,000 salary increase. Whether these rumors are true or not does not seem to matter to students or faculty. Lawrence's academic pressures give credence to both and people accept them with a shake of the head and an "I believe it." 

If you knew they work harder than undergraduates at the vast majority of schools only to have the members tell them that they do not and that schools like Michigan are not only cheaper but better. And now faculty members are faced with an equally perplexing situation: are the rumors about "publish or perish" (true)?

The whole situation is absurd. By and large, Lawrence students work hard. They do not need to take a false pride in going to a high pressure school. Faculty, to be blunt, are tongue tied, to a fault. We are paying for their teaching, not their publishing, abilities.

Before continuing the real and rumored debates on academic pressure at Lawrence, students and faculty alike should realize there is a difference between needless pressure and hard work.

If anything, these rumors only illustrate the rut Lawrence is in. It is a good school that does not seem to be getting anywhere near its full potential.

Anniversary

This Saturday marks the day that 125 years ago Lawrence was granted its charter making it the oldest coed institution in the state of Wisconsin. Since its inception the University exerted the most pressure on students, and that the faculty rejected a $20,000 raise. Whether these rumors are true or not does not seem to matter to students or faculty. Lawrence's academic pressures give credence to both and people accept them with a shake of the head and an "I believe it."

If anything, these rumors only illustrate the rut Lawrence is in. It is a good school that does not seem to be getting anywhere near its full potential.

Average Students

Most people are now willing to accept that there is no direct relationship between an individual's performance in school and his performance after graduation. We persist, however, in using grades as the most important admission requirement, and then, in giving students with high grade point averages preferential treatment.

In 1968, W. Benker, Dean of Admissions of Harvard College, asked the class of sixty graduates of the 1968 Harvard class who had gone on to be "outstanding in their chosen careers." He reached back so far to make certain the individuals he chose had received the high point of their careers in as many cases as possible. Benker found out that of the fifty, two-thirds would not have been admitted to Harvard under 1960 criteria. Even more would have been kept out by today's standards.

Academic performance in no way measures a student's ability, his desire for power or his ability to get along with others.

The administration and the faculty should be more realistic. They claim the average Lawrence student. They, in all likelihood, are the people who will put their education to its best advantage.
The Lawrenceian is looking for a creative artist to design ads, and two ambitious students to sell advertising. Both of these jobs pay well, and working schedules are up to the individual. This is an excellent exposure to a creative media, and a chance to earn some spare cash. Contact Bruce DeCly for 725-5373.

A workshop in programming the IBM 1620 computer will be offered from January 17 to 21. There will be two sessions: 1:30 to 4:00 p.m. and 7:00 to 9:30 p.m. For further information, contact Mr. W. E. Brown in the University Computer Center.

All students living off campus, except in university housing, should report their local addresses to the Registrar's Office immediately. Phone numbers should be included.

Petitions for LUCC position are due by January 17. The election will take place on January 24. The vacant seat is from the constituency presently designated as Trever-Sage-Off Campus. Submit your petition extension to either Paul Chicos or Dan Toycen if you are interested in filling this seat.

All students interested in the ACM Wilderness Field Station for summer 1972 should meet at 4:30 P.M. in Room 101 Younts on Thursday, January 30th. Mr. Richardson will show them the field stations and discuss the program. There will also be students present who have attended the field stations in previous years.

Seniors who wish to participate in planning social, cultural, and academic activities for a commencement week-end will have an opportunity to do so. According to Dean Charles F. Long, members of the class of 1972 are invited to volunteer to work with the President and other members of the Administration on the commencement planning committee. Anyone who would like to help propose and carry out ideas for the social life of the person he or her own commencement event should call the Deans office, extension 290.

There will be an organizational meeting for all those interested in participating in a Photography Workshop Monday evening at 8:30 in the dormitory of the Union (near Riverview).

The John Fitzgerald Kennedy School of Government of Harvard University announced a new graduate program in Public Policy Ph.D., Master's degree program. The program's professional school offerings are offered. Applicants should be interested in policy analysis and be at ease in both the world of words and the world of numbers. Write Dean Harry Werner, Autumn Center, Harvard University, Cambridge, Massachusetts 02138 for catalog and application.

The deadline for submitting applications for the Paris Seminar (Fall Term, 1972) is Friday, January 21. Blanks are still available from Mr. Snow in the Activities Office (426); completed applications should be returned to him also.

Four years after the merger between Milwaukee Female College and Downer College, the two colleges were united on the same campus on the northeastern side of Milwaukee where Milwaukee Downer College remained until 1964. The decision to merge with another educational institution was made by Milwaukee-Downer in the early 1960's as the college faced dwindling enrollments, financial difficulties, and pressure to sell its 43-acre, 14 building campus to the neighboring University of Wisconsin-Milwaukee.

The consolidation with Milwaukee-Downer College was the occasion for Lawrence to once again become known as Lawrence University. Lawrence's assets had risen to $10-1/2 million. Between 1947 and 1957, a period overlapping the administrations of Drs. Pusey and Knight, Lawrence more than doubled its assets, so that its total worth in 1967 was $44-1/2 million. The same period was also one of unparalleled physical growth for the university, as Lawrence completed its Stephenson Hall of Science, constructed its Wurster Center Art Center, the Memorial Union, a sixth house for the fraternity quadrangle, and a women's dormitory. By 1962, Lawrence's assets had risen to $16 million and two years later, after a fund drive in which the university was successful in meeting a Ford Foundation challenge gift, the university, as Lawrence, declared that its expansion had been completed and its existence had been operated as a university.

Recent Years
When Lawrence celebrated its centennial in 1947, its total institutional worth was $44 million. Today, its total worth is nearly $46 million. Between 1947 and 1971, a period overlapping the administrations of Drs. Pusey and Knight, Lawrence more than doubled its assets, so that its total worth in 1967 was $44-1/2 million. The same period was also one of unparalleled physical growth for the university, as Lawrence completed its Stephenson Hall of Science, constructed its Wurster Center Art Center, the Memorial Union, a sixth house for the fraternity quadrangle, and a women's dormitory. By 1962, Lawrence's assets had risen to $16 million and two years later, after a fund drive in which the university was successful in meeting a Ford Foundation challenge gift, the university, as Lawrence, declared that its expansion had been completed and its existence had been operated as a university.

LUCU To Hold Monday Election
On January 17, there will be an election to fill two positions on LUCU. The vacancies have resulted due to the election of Paul Chicos as President of LUCU and the departure to London of Andrew Kainow. Both of these individuals represented the members of Plantz, Kohler, and the Quad; this combined constituency chose two new representatives.

A letter was sent out on January 4 to the members of this constituency explaining the above situation and also stating that petitions for the positions were due by January 10. The following people responded to the letter and thus represent your choices: Jim Citrino, Delta Tau Delta; Kathy Green, Kohler Hall; Tom Hosmanek, Phi Gamma Delta; and Jim Simmons, Beta Theta Pi.

Dracula Bares Fangs In Toothsome Musical

Dracula, a new musical play in one act, the original creation of Lawrence senior Tom Herman, premieres at Lawrence as composer of its incidental music. "The result is a mixture of opera, musical comedy, and melodrama that blooms as a new and probably very interesting trail in musical theatre," says Day, who is director of the production as well as composer of its incidental music. "The result is a mixture of opera, musical comedy, and melodrama that blooms as a new and probably very interesting trail in musical theatre." The writing of Dracula, the first original play to be produced at Lawrence in several years, came about chiefly as a result of its author's great admiration for the original 1931 Dracula film, which starred Bela Lugosi. "Our first impulse" said Schleis, "was that it would make a marvelous opera, but that being rather impractical, we were forced to consider other avenues of musical adaptation." As all three authors had been involved in the production of Phantom of the Opera, an original children's play by Herman, Day, and Bonnie Koester, that work's approach served as a starting point - i.e., the use of appropriate selections from grand opera as vocal selections. From there, the score was augmented by the addition of Day's ecstatic but always hyper-romantic incidental music for two pianos, in which the influence of Liszt and Wagner (including the use of two liebmeisteres, 5Realizing "Dracula" and "Redemption") is always apparent. The end result is a one-act play in thirteen scenes which attempts, through a series of carefully planned vignettes, to trace the course of Dracula's career as it gradually affects the lives of a wealthy Victorian family of the 1890's. The cast of Dracula is made up largely of Conservatory students through the title role will be played by senior biology student Herman as "Lawrence's answer to Christopher Lee." Much more unusual, however, is the casting of Lynn Trepel, Philip Sargent, Duffie Adelson, David Lauren, Tim Chamberlain, Rachel Kopel, and co-authors Herman and Day. Duo-pianists are Nancy Boston and Robert McDonald. Dracolas aims to be fresh yet familiar, reverent yet ridicule, frightening yet farcical," says Day. "It brings ultra-romance back to the Lawrence stage in such a way as to assure its renaissance at least the next decade."

Right now we're having a January Sale on things to wear. For young men like you. Come browse.

"Civilisation" To be Shown in Stansbury

To be Shown
In Stansbury
Stansbury Theatre at 3 and 4 p.m.

presented Sunday afternoons in
Corporation. Under the program,
distribution program made
viewers. The entire series was
premiered at the National
Education Television.

The film series "Civilisation" was
originally produced for the
Western Civilization through the
visual arts, music, literature, and
political history, from the fall of
the Roman Empire through the
20th Century. The films were
produced by Lord Clark,

two producers, and a three-man
camera crew on a two-year
mission through 15 countries to film
historical sites and events.

"Civilisation" takes the viewer
on a journey through the
events which have forged Western

The film series focuses on the
development of Western civilisation as exquisitely illustrated by man's most impressive achievements: architecture, sculpture and
sculpture. This is the common
heritage of Western man,
spanning 1,000 years.

The film series subjects
include the Gothic cathedrals, the
age of sculpture, the Renaissance
and the Reformations, the
bourgeois revolution, French
 democracy in Holland and the
Dutch painters, the Enlighten-
ment in Europe and America,
reaction and revolution in the
19th Century, and modern
technology and materialism.

Food Served All Day
Looms As Possibility

In a committee bound world
such as ours, what can be more
innocuous sounding than the
"Lawrence Food Committee?"
The image is wrong. The Food
Committee is one of few on
campus which can have a direct
effect on every student, every
day.

A continuous service food
system, an important change for
Lawrence students, was dis-
cussed at a recent meeting—
possibly to begin this year. Under
this type of program, Mrs.
Chapin, Food Service director,
explained, breakfast could be
served from 7:30 to 10:30, lunch
from noon to 4:00 and dinner
from 4:30 to 6:30 at the Downer
Center, with Colman in use
during peak periods, as it is now.
All of this should give many
students, now rushed because of
late classes, more time for a
leisurely meal, and time for late
rivers to have breakfast when
they want it.

A change like this entails many
problems which must be settled
before it can be put into
operation. A major problem
would be identification, since all
students may eat at either
downer or Colman and at
anytime they wish, but they can
only have one of each meal. A
possible solution is a new plastic
school I.D. with a picture. This
was also be useful for check
cashing and admission to athletic
activities, a member of the
Committee pointed out.

At this same meeting the
committee discussed and
established a menu for the 150th
Anniversary All School Dinner on
Jan. 10, and formalized plans for
a Mexican Day in February.

And all those complaints voiced
about the cafeteria food? If car-
rried through the right channels
(Told to dorm representatives on
the committee whose names
should be posted.) There can be
solutions. Mrs. Chapin listened
and carefully recorded student
complaints about greasy bacon,
hard rolls, and lack of diet
dressings.

The meeting ended with a
restatement of the Food Center's
policies, which the student
committee members are to
transfer back to the dorms.

Overall the committee shows
itself to be useful to students in
that it performs specific func-
tions which can be greatly in-
fluenced by them.

Human Relations Committee
Sponsors Gestalt Colloquium

The Human Relations Committee
announces a week long
Gestalt colloquium to run from
January 18 to 28. Three
therapists from the Gestalt Institute in Canada will hold a series
of workshops dealing with the
gestalt experiential approach
wards art, music, dreams, massage, and awareness. There
will also be three weekend groups led by the therapists aimed at
giving students an introduction to the gestalt method.

Two introductory movies will be shown Thursday, January 18, 7:30 p.m. at Youngchild. Both explain gestalt therapy and
designed to give a good basic
introduction to the method.

Students interested in participating in the weekend groups
and workshops may sign up at the Student Activities Office in
the Union or can contact members of the Human Relations
Committee.

Commander Cody Looks “For Hit of Jim Beam” down the highway in fourth gear. The Pistoleros come at you with all the power they have, and you will see them that hasn’t been knocked out by the superior skill of the Commander and his bandmates. Billy C. blow out your horn, or the West

RECORDS
Virginia Creeper trucks on the pedal steel. That’s not even to mention the rest of the boys in the band who are an integral part of the entire crew experience as the aforementioned three.

The album itself is a perfect synthesis of the essence of the problem plaguing the Commander and his bandmates. That being that they would like to play high energy country rock, but that they usually wind up too “fucked up” to do anything other than just blast away for all they’re worth. Consequently, this album starts out tightly arranged and ends up in a free form album. Included will be such soon-to-be-classics as “Looking in the World Through a Windshield” and “I Took Three Benzenes and My Truck Won’t Start.” This disc will be out April 1. But why wait? Buy it tonight! I’ll meet you there.

Women Top Men In Grade Battle

The overall grade points for first term were released recently with the seniors coming out leading the way with a 2.16 overall. Junior women came close to matching the 2.12. Senior men came close to matching the 1.90. Also just missing the 2.0 point mark were junior men and 1.96 and 1.96 g.p.a., respectively. Round out the quartet are freshmen women with 1.98 and 1.96, and freshmen men with 1.96. All things considered, this is the best freshman class that has been produced in quite some time. We are quite proud of these freshmen.

The overall grade point average for the men was 1.87 while the women had 2.14, 2.05, and 2.06 respectively. The Zetas are the overall grade point average leaders with 2.14, as compared with the Phi Delta Tau with 2.06. However, the Theta Chi have the better cumulative average in the sororities with 1.85, as compared with the Phi Delta Tau with 1.87.

Presidents...

... (cont. from p. 1, col. 4)

Curtis Tarr

From 1952-58, Tarr was vice president of the Sierra Tractor Co. in Chico, Calif., while also serving as a lecturer at Chico State College. He was a staff member of the Second Hoover Commission from 1954-55 and ran unsuccessful campaigns for Congress.

While serving as Lawrence president from 1963-68, Tarr served as co-chairman of the Air Force on Local Government Finance and Organization for the State of Wisconsin. It was during his tenure as president that Lawrence consolidated with Milwaukee Dooner College in 1969, becoming Lawrence University in 1969-70 to become assistant secretary of the Air Force for Manpower and Reserve Affairs. Eight months later, Tarr was given the Nixon name to director of the U.S. Selective Service.

Smith Makes Changes

Dr. Smith came to Lawrence in 1980 from Ohio University, Athens, Ohio, where he was Provost and Professor of Physics. Smith graduated magna cum laude from Kenyon College with a bachelor of arts degree in physics in 1947. He received his Ph.D. in physics from Ohio State University in 1952. He taught at Kenyon College and Ohio State University before joining the Ohio University faculty in 1952. He was named assistant to the president of the university in 1953, and served as vice president for academic affairs before he was named provost in 1966.

Coming to Lawrence in 1969, Dr. Smith was an instrument in the implementation of many new academic programs and curriculum changes, many of which were recommended by the recommendations of the Select Committee on Planning which completed its year-long study of Lawrence's academic program in the fall of 1969. Among the changes were an expansion of the university's program for freshmen, a major reform in distribution requirements, and the development of more opportunities for students to develop their own educational programs in most individual needs.

Racine Girls Offered Grant

The Racine Branch of the American Association of University Women announced that applications are now being accepted for the AAUW scholarship which is awarded annually to a Racine County girl. The scholarship award, which is based on academic achievement and financial need, is awarded each year to a Racine County girl beginning her junior year; the fall the grant is awarded.

Frosh BB Squad

Wins 1 and Loses 1

Lawrence's freshmen basketball team has split its first two games of the season. On January 7, the Vikings defeated the Northeast Wisconsin Institute of Technology, 90-68, but lost on January 10 to the University of Wisconsin-Fox Valley, 71-69.

In their opener, the Vikings' playing looked sluggish in the first half, leading by just two points, 38-36. In the second half, Lawrence used some cold shooting by WVT to propel themselves to victory.

Leading scorer for the game was the Vikings' Pete Prunuske, with 21 points. Ted Peters had 17, and Mark Roozen dumped in 15. Prunuske also led the team in rebounds with 18, followed by Rozen with 15.

But three nights later, Lawrence was beaten by the same cold shooting which had helped it take its opener. The Vikings shot 22 per cent, and although they still had two more field goals than Fox Valley, they lost the game on the line, where they were outshot, 21-15.

Mark Roozen had a big night in a losing cause, with 29 points and 12 rebounds. Pete Prunuske also did a fine job, with 19 points and 18 boards. The freshmen play next on Saturday, when they host Beloit.

Tom Rittenhouse

Deadline for filing applications is April 1. The scholarship will be awarded at AAUW's annual banquet in May.

Application blanks may be obtained from Mrs. Robert Jeanmaire, 325 Sherrie Lane, Racine, Wisconsin 53406, the scholarship committee chairman, or from deans or student affairs directors at a student's college or university.

Application blanks should be returned to Mrs. Jeanmaire, along with a transcript of the student's credits for her college work to date.

Date Night at the Patio

Coming to Lawrence in 1969.

Serving as a lecturer at Chico State College. He was a staff member of the Second Hoover Commission from 1954-55 and ran unsuccessful campaigns for Congress.

While serving as Lawrence president from 1963-68, Tarr served as co-chairman of the Air Force on Local Government Finance and Organization for the State of Wisconsin. It was during his tenure as president that Lawrence consolidated with Milwaukee Dooner College in 1969, becoming Lawrence University in 1969-70 to become assistant secretary of the Air Force for Manpower and Reserve Affairs. Eight months later, Tarr was given the Nixon name to director of the U.S. Selective Service.

Smith Makes Changes

Dr. Smith came to Lawrence in 1980 from Ohio University, Athens, Ohio, where he was Provost and Professor of Physics. Smith graduated magna cum laude from Kenyon College with a bachelor of arts degree in physics in 1947. He received his Ph.D. in physics from Ohio State University in 1952. He taught at Kenyon College and Ohio State University before joining the Ohio University faculty in 1952. He was named assistant to the president of the university in 1953, and served as vice president for academic affairs before he was named provost in 1966.

Coming to Lawrence in 1969, Dr. Smith was an instrument in the implementation of many new academic programs and curriculum changes, many of which were recommended by the recommendations of the Select Committee on Planning which completed its year-long study of Lawrence's academic program in the fall of 1969. Among the changes were an expansion of the university's program for freshmen, a major reform in distribution requirements, and the development of more opportunities for students to develop their own educational programs in most individual needs.

Commander Cody Looks
"For Hit of Jim Beam"

by CORBINE CASTLE

Commander Cody, the Midwest's most
popular space cowboy, is in town this week.
His band, the Last Planet Airmen, will be
playing at the Opera House. This is one of
the hottest acts to come to town in years.
They're known for their high energy
performances and their ability to
entertain crowds.

Dr. ALLEN WHITING,
the University of Michigan,
presented the first of three lectures on
relations between the U.S., Russia, and China.
Next in the series will be U.W.
Edward Friedman on January 24.

Whiting Analyzes US-China
Relations in Opening Talk

by G.E. JANKSY

Riverwalk Lounge held a
lecture on the relationship
between China and the U.S.
Dr. Whiting, a political
scientist, discussed the
tensions between the two
countries and the
possibility of peace.

Women Top Men
In Grade Battle

The overall grade point
averages for women were
released recently. The average
for women in the sophomores
was 2.38, while the average
for men was 2.14. This marks
a significant increase in
women's academic performance.

Bill Keyes Takes
State Piano Contest

At the Wisconsin State Music
Contest in Madison, 79
students competed in the
categorization contest, sponsored
by the Wisconsin Music Teachers
Association. The contest was
won by Bill Keyes, a student of
Thomas Beardsley, Assistant
Professor of Music.

The Greek pledge 106 Frost

Lawrence's fraternities and
sororities completed their formal
rush weekend last weekend with
nearly 10 per cent of the freshman
class pledging.

Ending up with the most
dads on the Quad were the Phi
Fijis (41). The DG's (69) and Thetas
(26) were next, followed by the
Pi Phis (16) and Alpha Chis (14).

Dr. Whiting touched on
many other areas, including
the relationship between
China and Taiwan. He
stressed the importance of
understanding the
complexities of the
relationship.

China and Taiwan will
be able to work together.

Presidents...

Dr. Knight was an assistant professor of English at Yale when he was chosen president of Lawrence. Under his leadership, Lawrence doubled its geographical base of students, saw a 50 per cent increase in applications (from 1904), an increase in book value of its physical plant of more than 100 per cent, and an increase in endowment of more than 150 per cent. Six major buildings, one every 10 months, were added to the university during Knight's administration, and numerous curricular and co-curricular programs were adapted, including the development of non-European studies and the strengthening of economics and the sciences at Lawrence.

Knight became president of Dale University in 1962, and served in that post until 1968, when he assumed his current position with RTC, in which he is responsible for developing relationships with the educational community both at home and abroad.

From 1932-34, Tarr was vice president of the Sierra Tractor Co. in Chico, Calif., while also serving as a lecturer at Chico State College. He was a staff member for the Second Hoover Commission from 1945-46 and ran unsuccessfully in his home state for Congress.

Coming to Lawrence as president from 1963-69, Tarr served in the Air Force Task Force on Local Government Finance and Organization for the State of Wisconsin. It was during his tenure as president that Lawrence consolidated with Milwaukee-Downer College in 1964. Tarr left Lawrence in 1966 to become assistant secretary of the Air Force for Manpower and Reserve Affairs. Eight months later, Nixon named him director of the U.S. Selective Service.

He was named assistant to be president of the university in 1968, and became vice president for academic affairs before he was named president in 1969.

Coming to Lawrence in 1969, Dr. Smith was an instrument in the implementation of many new programs and curriculum changes, many of which were contained in the recommendations of the Select Commission on Education. Lawrence completed its year-long study of Lawrence's academic program in the fall of 1969. Among the changes was an expansion of the university's program for freshmen, a major reform in distributional requirements, and the development of more opportunities for students to develop their own educational programs to meet individual needs.

Employment Expert Advises Job Seekers

Charley O'Meara, Manager of Corporate Recruiting for Kimberly-Clark, advised an audience of seniors how to go job hunting Wednesday, January 11 in Rev­erview Lounge.

O'Meara stressed that while the job market wasn't as good as in the late 60's, most graduates, once seniors are able to secure jobs. "It isn't a case of mass unemploy­ment as some of the media would have you believe. At the moment, though, it's a buyer's market and you're selling," O'Meara said.

O'Meara suggested that there are basically two ways to get a job: through job interviews offered by recruiters on campuses and through personal campaigns. He warned the students that not all major companies are coming on campus right now. A good resume is essential to the job hunter, according to O'Meara. "As much work as you do toward doing it well, that's what results you'll get." He urged that the resumes be left at every step in a door to door campaign and included in every application done through the mail.

Students sitting in Reviewview were told to set their sights on primary job targets but to also be open to other options. Job seekers can obtain lists of local and state companies through the state employment service and should also consult want ads and personal friends in business.

O'Meara didn't recommend that students become affiliated with employment agencies. He claimed that employers are not willing to pay the agencies for connections with unqualified people.

Students should keep a record of the interviews they have—date, name of interviewer, and a brief summary of the interview. This will serve as a reference point if they have an opportunity to be interviewed again or are offered a job.

O'Meara pointed out that applicants who bother to learn something about the company to which they are applying stand a much better chance of being hired than those who can't answer questions like, "Do you know what we manufacture? Do you know what kind of job you're applying for?" It's also wise to be able to review personal goals and background quickly without gouging for words.

"The more education you get, the more valuable you are," said O'Meara. Today, a graduate degree might not bring im­mediate results, but will be crucial later when promotion or an increase in wage is being considered.

It was suggested that students concentrate on the company they can find ones they really want. He concluded by stating, "It's there if you work for it."
Watching Lawrence's young basketball team take it on the nose in the Rockford Tournament three weeks ago reminded one of the many things that the Vikings often do: quick though they may be, they don't yet know how to channel and most effectively utilize the speed they have.

This was apparent during both games of the tournament. The Vikings, comprised mostly of sophomores, seemed hemmed in by their offensive patterns on many occasions. As a result, they were soundly trounced by host Rockford, 87-77 last Friday, and was nipped at the wire by Knox, 86-87, the following afternoon.

"If we only had more men suited up," the Viking mentor moaned. Poulson was referring to the fact that no fewer than three of his players were unable to make the trip due to illness or injury.

Both Jack Hoag and Matt Sigler were sidelined due to illness, with Hoag having a brief stay in a hospital near his home. Lawrence took it on the chin against Wisconsin, 13 of 31 floor shots and added three of five free throws for 29 points. The outstanding effort by the Vikes in the weekend's action.

Lawrence's hesitance in running its offense must also be attributed to a general lack of experience. The Vikings showed both man-to-man and zone defenses at irregular intervals, especially during the Eureka contest. The apparent cause was the various defenses caused Lawrence to take poorer shots than it would have liked. Lawrence will learn to reverse the uniformity of its play, but it must take time.

"What time and experience cannot take care of is the care of the Vikings' lack of height. Without a starter taller than 6'3, the Vikings can expect to take a backseat most of the season in rebounding. Meat and potatoes will help, but because of their lack of size, the Vikings will find it tough to hold their own on the boards. In the conference contests.

The picture of the Season need not be entirely bleak, though. The Vikings' strongest asset is that they are quick and fast. This makes it too weak to run an effective fast break offense, the Vikings have used their speed on defense in the past. The Vikings are a half-speed team. This tactic has enabled the Vikes to register their only victory thus far, a 73-61 demolition of Dominican on Monday night, November 11, and it kept them in the game against Eureka. A press seems to be Lawrence's prime weapon in offsetting any height disadvantage.

Young and small though they may be, the Vikings may pull off a few surprises this season. Although a majority of the squad have not played much basketball, they are hard working and eager to learn. To be realistic, Lawrence will go into nearly all of its games as the underdog. But if you like watching a team pull off a few surprises this season. Although a majority of the squad have not played much basketball, they are hard working and eager to learn. To be realistic, Lawrence will go into nearly all of its games as the underdog. But if you like watching a team

JIM ("J.T.") Toliver fires a jump shot over freshman Ted Peters in a recent basketball practice. The varsity carried a 1-9 record into this weekend's action.

Outmanned Vikes Drop Two

Play Host to Coe and Beloit

Roberts, as a University of Kentucky grad, has been associated with basketball schedules for 12 years. The Vikings' schedule strength this season has about an equal number of new and familiar faces.

The coach will be making their first appearance in a Viking uniform; freshmen Jerome Tuada at 138 pounds, Lloyd Norstrom at 142, Bob Brachter at 177, and Glenn Gantke at 190.

Sophomore Bob Beirsdon will be starting his second season at Lawrence, while junior Mike Bremtman will wrestle at 154.

Rounding out the list, the 6'3" sophomore Tom Cornell at 162, junior Dick Seebold at 6'3" sophomore John Drahman at 169, and senior Ron Richardson at the Heavyweight position. Seebold, who has not wrestled since his freshman year, takes the place of senior Doug Gilbert, who recently injured his elbow during practice.

Besides the meet against Milwaukee Tech Wednesday, the Vikings will host Marquette College Saturday at 1:30 P.M.

(LUN)-Lawrence University will host a Football Coaching Seminar for high school and college coaches from throughout Wisconsin starting Monday, Jan. 27.

The seminar, which will feature top coaches from throughout the United States including: Charles McClendon, head football coach at Louisiana State University, is designed to present coaches advanced techniques for developing and organizing a football offense. Each seminar lecture is presented by a different successful coach and the seminar can be taken for college graduate, level credit or audited without credit.

Sponsored by Lewis College of Portage, 11th, the seminar consists of 13 three-hour sessions which will be held from 7 to 9 p.m. in Lawrence's Alexander Gym.

All of the sessions will be held on Monday nights through March 27 with the exception of the seminar session featuring Mcclendon, to be held on Wed., March 27.

Other coaches to lecture in the series include: Howard Koistad, St. Norbert College, Jan. 19; Leonard Shurmer, University of Wisconsin, Madison, Coach Keller, Carroll College, Jan, 21; John C.函 Knecht, University of Wisconson, Jan, 31; Jesse Branch, Kansas University, Feb. 7, Norm Amundsen, Valparaiso University, Feb, 14, Vince DiFrancesco, Carroll College, Feb. 21; Bob and acetualwis, of Toledo, March 6, Ron Roberts, Lewis College of Portage, Jan. 31; Harold Schumacher, Oshkosh High School, March 16, and Ron Meikle, Neenah High School, March 27.

Registration for the seminar can be made 4 p.m. on the evening of the first scheduled seminar. All registrants will be required to present a conference agenda with the second session being held on Monmouth on its home floor in Lawrence's Alexander Gym.

The fee for the seminar is $68 to attend the entire program. 

Tuition for the seminar is $46 to attend the entire program and $48 if taken for no credit.
