The London-Eningen Meeting Reveals Vital Information by TERRY KENT

Guided by Lawrence, the Foreign Studies Committee, began to get the ball rolling so far as the foreign campuses are concerned.

Last week the organizational meeting for the new year was going to either London or Eningen next year was held.

Applications were also hand delivered. Any interested party that was not at the meeting can still get an application in the faculty office on second floor Main Hall. Mason announced that the first preference date will be March 6th.

By this he means that all applications in the fall will be given first priority, although no applications will be considered before that date. This gives everyone a fair chance to apply.

There is one catch, however. There is one exception to the above, and the student to go overseas if he is on probation excepted.

The FSC places little emphasis on probation, but the student has as good a chance as an A-student.

The two main difficulties that the student faces are the so-called Parklin and the Foreign Studies Committee. The FSC is much different than the FSC in the United States. The FSC does not handle the A-student quite the same way as the United States FSC.

However, there is one way. Very rarely does the FSC allow a student to go overseas if he is on probation excepted.

The only absolute requirement of admission that the student has is an overall grade-point average of 1.5, and Government 11, International Seminar Programs.

In the past, most of the work, and the Ford Foundation mission from the American Conservatory at the Paris Conservatory under a Fulbright scholarship was composed under a composer and dedicated to native.
Bad News for Athletics

Another stab in the back has been given to the status of athletics at Lawrence. The Goldgar Committee has recommended that the Committee on Intercollegiate Athletics be abolished.

This committee, which was set up to be the link between the athletic department and the rest of the faculty, will now be reduced to a single person, whose duty it will be to gauge alone the attitudes of the faculty on athletic matters and report to the Midwest Conference.

This idea has several drawbacks. For one, without the benefit of a committee which is represented by coaches and other faculty, it will be impossible for the representative to base his report on total faculty opinion. Thus, the representative may on occasion unknowingly misrepresent the faculty as a whole in voting on athletic matters at conference meetings.

For another, the lack of communication between the athletic department and the rest of the faculty, which will ultimately result from the dissolution of the committee, may create an atmosphere of friction within the university on opposite banks of the Fox River. The delicate balance between athletics and academics at Lawrence will be disrupted. The effect can only be bad and one on the general state of athletics.

Music Commissioning

Lawrence commissioned a Brown University professor to conduct the work honoring the university's 125th anniversary.

At a time when Lawrence's finances are tight, this move is improper. It not only because of financial reasons but because Lawrence has one of the best conservatories in the Midwest.

Concert-Goers To Hear Faure and Hovhaness

Strong religious feeling inspired the music of the two composers whose works will be performed in Lawrence University's Choral-Orchestral concert on Sunday, by MAURICE GILLOON.

Faculty Keeps Busy in '71

Eaeh characterized the Lawrence concern for the deterioration in the summer months of 1971. "As an aid toward solving the problem," he stated in his report last June in Lawrence's London Stage Data.

"The Hurents' projects discovered a problem which we had been thinking about," Professor Ronald Mason, whose research is in the field of historic and anthropological research, told students at a music festival on the campus.

"In our society, everyone is a mutant and it is unwise to try to get them to fit in," Mason said.

"The University is in the process of deciding whether or not to implement it. If we can do so with success, we will be taking a great step in helping the community at large to accept the problem." The Environmental Task Force submitted a report last June in which several recommendations were made. Among the key recommendations was the use of plastic containers in dining units to lower temperatures in the winter and to conserve heat resources. Some of the recommendations are yet to be implemented, but Lawrence has gone ahead with recommendations calling for recycling of waste and the use of recycled products. Most of the university's paper requirements are being met through recycled waste, and Lawrence has conducted research on its campus area to take part in the Appleton recycling program for cans and bottles.

A number of Lawrence students have been selected for the National Science Foundation's Science Faculty Career Development program.

Grants made to Michael J. LaMarca, associate professor of biology, and David M. Cook, a former Lawrence faculty member, also were awarded by Lawrence University.

The settlement, Mason believes, is one that was started by tribes who provided the explorer Robert LaSalle into the interior of the country and followed him. The settlement, which is located on the island north of Lake Michigan, was first seen by the explorer in 1669. The settlement's name comes from the Huron tribe, who were the first to settle there.

First Prize Awarded In Piano Competition

Anne Simonett, a sophomore Conservatory student, won first prize in the piano division of the Wisconsin Federation of Music Clubs competition held in Milwaukee on February 5. Her award included a cash prize and a television performance. She is a student of Edward Rath, Instructor in Music in the Conservatory.

Mortar Board, Career Planning Start Workshops

Beginning on Wednesday, February 23rd, at 7:30 p.m., Mortar Board will conduct a seminar on the Office of Career Planning and Placement. This will be the first in a continuing series of career workshops. The first program will highlight opportunities in the allied health fields.

Morton Board conceived of the idea of career workshops in response of what they feel is the need to bring to light career opportunities other than those classically associated with a liberal education. The emphasis of the program is to present less familiar and new opportunities available to the student with a full or partial college education.

The program will be particularly aimed at the Lawrence student who is looking to start into a career step after graduation, but rather at students of all levels who are looking for different opportunities. In fact, some of the careers to be presented according to the student begin to plan early in his college career.

The Allied Health Fields Workshop will consist of three programs. Mr. John Shepard, Hospital Administrator, Appleton Memorial Hospital, will speak Wednesday, February 2, 7:30 p.m., in Riverview Lounge on "Allied Health Fields - An Administrator's Point of View."

The second program will feature a panel of six therapists: art, music, dance, physical, occupational, and speech. The program, "Therapy - Something in It for Everyone," will be presented on Friday, February 25, 7:30 p.m. in Riverview Lounge.

After the panel discussion, small groups will be made available to any students interested in a specific therapeutic specialty.

Any students interested in meeting with one of the therapists should contact Jan Kenyon at 792-456, or ext. 235 in the Lower Kress. Monday, February 28, the final program of the workshop will feature "Medical Technology - Something in It for the Students." This will be presented on Wednesday, February 23, 7:30 p.m. in Youngchild Room 90.

The lecture will be at 4:30 p.m., Tuesday, February 22, in Youngchild Room 90. Ms. Signell received the B.S. degree from Antioch College in 1952 and the M.S. and Ph.D. degrees from the University of Rochester in 1953 and 1958, respectively.

For the current year, she is unemployed. She feels that there are several reasons for her lack of foreign trade and entanglements.

Chinese research interests lie in the study of the interface between high energy physics and nuclear physics.

China

Chinese are understandably less interested in what the American people have been. China's self image seems to be another reason for her lack of foreign trade and entanglements.

"Americans have a highly distorted view of China, seeing it as an isolated and backward country which has been very slow to act, and is smaller than the US which has isolated itself from China for all of these years," declared Prof. Klein, claiming that China is the second largest economy in the world since 1953.

The Chinese rulers now well-equipped to handle foreign affairs, however, as their press picks up US news about 48 hours after it is printed here. All major publications from outside of China are received. A paper of strictly western news releases is also circulated among the higher echelons. There is also a highly trained diplomatic corps.

Creation of Bangladesh
Explained by Adenwalla

(LYN)—The breakup of the Pakistan nation has been inevitable since it was created in 1947, according to Minoo Adenwalla, professor of history and political science. And although the government of India has been working towards this end, "the creation of a nation out of religious fervor and fear of inequality with India's predominantly Hindu government do not provide the ingredients of unity for a new nation," he said.

Adenwalla spoke Tuesday at a meeting of the Lawrence University Great Decisions discussion group. He said that although the postponement of a Constituent Assembly by West Pakistan in March 1971, precipitated the growth of tensions which erupted into armed intervention, he has been critical of "the notion that the 10 million refugees in India were not going to return until there was some change in the political situation in Pakistan." Adenwalla said that Pakistan held its first free elections since its creation. The election, instead of building unity between East and West Pakistan, emphasized the differences, which West Pakistan feared would not be capable of compromise in the proposed Constituent Assembly, dominated by East Pakistan delegates. Pakistan, which provided nearly 50 per cent of the entire nation's foreign trade, wanted a weak decentralized government while West Pakistan wanted a strong, centralized government.

After postponement of the Constituent Assembly, violence broke out in East Pakistan. Both sides were guilty of great butchery and slaughter, and 10 million refugees were forced to flee East Pakistan into India.

Now you can buy Fisher stereo right here on campus.

For big discounts on Fisher stereo equipment, contact:

**BASIL VASILIOU**

726 East John Street

Appleton, Wisconsin 54911

Tel. (414) 733-9690

**Fisher**

We invented high fidelity.

From now on, there's a better way to buy stereo equipment at tremendous discounts than consulting a mail order catalog. You just consult Fisher's student representative, instead. He'll show you a catalog of Fisher equipment, and give you advice on the equipment that suits your needs. And, if you want, he'll arrange for a demonstration to you can hear what you'll be buying. Then, he processes your order, at a tremendous discount.

Fisher selected this student because he is uniformly quite happy with his Fisher representative. He knows a lot about high fidelity. He's a reliable person, and since he represents himself, he knows what students need in the way of stereo equipment. And since he's the Fisher representative, he's got what it takes to make sure Fisher makes practically everything.
Viking Grapplers To Play Host To Conference Meet

Few people on the Lawrence campus have ever witnessed an Intercollegiate Conference in action, and they know relatively little about the schools that participate. This weekend, at least two of these schools will have the opportunity to witness the great sport of wrestling and some of its finer competitors as the Lawrence Vikes host the Lawrence Invitational and the Midwest Conference meets.

Starting today at 10 a.m., the Vikes will compete in the Lawrence Invitational. This is an excellent chance for students to observe such fine teams as Carthage College of Kenosha, which has yet to lose this season in either conference or triangular meet, as well as the always powerful Ripon Robinson.

Lawrentians will also have an excellent chance to cheer their own grapplers onto victory. This year’s wrestling squad, with a 9-1 record, possesses an excellent chance to walk off with the team championship. The Lawrence Bluebirds depend upon such people as Jerry Tusa at 138, Joe Henderson at 141, Floyd Norton at 187, and Ron Richardson at 198.

All the proceeds from the meet will be donated to the Dan Winkler Fund to help cover Dan’s medical expenses resulting from his wrestling practice last year.

Defending champion Cornell led by last years champions Los Angeles at 160. Pete Holmes at 187, and Rich Hahn at 197.

Future tournaments will include the Midwest Conference tournament, which will be held the coming weekend. The Vikes will host the conference meet at 10 a.m. Saturday at Hummel Hall. The students will be an American girl. Before long you will be an American woman. It is important to America that you accept the traditional American standards of behavior, education, and service. The student handbook will be an American standard. The Lawrence Handbook for Students.
