Richardson To Give Speech
For UN Day Observance

WILLIAM A. RICHARDSON, editor-in-chief of the United Nations monthly Chronicle, will speak at 3 p.m. Sunday, Oct. 24 in the review lounge of the Union.

Richardson’s appearance marks the 50th anniversary of the signing of the United Nations charter in San Francisco and will be broadcast over WLEW at 8 p.m.

He comes in conjunction with the annual United Nations day observance, which initiates a week of campus-wide activities focused on the work of the international body.

Richardson joined the Secretariat of the United Nations in 1962, where he serves in the office of Public Information.

A citizen of Trinidad and Tobago, he received his early education in Port-of-Spain, Trinidad, where he received the master of arts degree in political science from the University of London, where he received the master of arts degree in political science in 1955.

Richardson entered as a reference librarian in the Trinidad Central Library and as a correspondent and producer of radio news and feature programs. He was later employed for eight years by the British Broadcasting Corporation, in which he traveled to African, Caribbean, and Central American countries to record and edit material for the Home and General Overseas services of the BBC.

Following his work with the BBC, Richardson served the government of the Federation of West India for five years.

He developed the Federal Information service and acted as advisor to the Governor General and the Prime Minister of the Federation on public relations matters.

Lawrence to Host 'Vietnam Dialogue'

A three-day symposium entitled "Vietnam Dialogue" is planned for Wednesday, Nov. 3 through Friday, Nov. 5, beginning with a speech by Frank Tager about the historical and cultural backdrops of Vietnam.

He will speak in the Hemisphere lounge, and students are urged to attend so other speakers will not have to repeat this material.

On Thursday Wesley Fishel, professor in political science at Michigan State, will deliver a conference speech about Vietnam. Fishel is accredited by many people with having secured U.S. aid for the Dorn government.

Thursday afternoon David Wurzburg, provost of the University of Missouri, will speak on "Vietnam: A Preliminary Strategy" in Randall auditorium.

Thursday evening a symposium is planned. Among the participants in the affair will be representatives of the National Student Association and the National Organization for Women.

In a meeting held Tuesday, Oct. 12, the Lawrence university chapter of Phi Delta Epsilon, national honorary collegiate physicians, planned and elected new officers.

The new officers are Lawrence physicians Henry Arretz, secretary; Tom Jansen, business manager; and Robert A. Drost, president-elect.

Senate Discusses
DISCUSSION of the winter concert and dance were once again the main topic of debate at the Student Senate meeting held last Monday.

Special Projects committee announced that their original intention of contracting Gary and the Playboys for both a dance and a concert on separate nights had met with some unexpected complications.

The group’s price had just recently risen considerably beyond the amount the committee had originally intended to pay. A list of other entertainers was submitted to the Senate for consideration.

These five were Carolyn Hester, Judy Collins, Joe and Kathy, the Village Stompers, the We Five, and Glen Yarbrough. Members voted to contract Glen Yarbrough for the concert and to get the Chancellors for the dance.

Winter Performers
Stompers were selected as alternates in case of any difficulties in getting Glen Yarbrough.

See Des Iloes and Pat Weber have been selected to serve as this year’s Ariel editors. Anyone interested in working on the Ariel staff may contact either of them.

A MOTION was carried to set up a special committee to handle the arrangements for the group flights between Milwaukee and New York being offered by Northwest airlines during the summer.

Homecoming committee announced that work for this year’s homecoming events is progressing rapidly. Several former homecoming queens from as far back as 1938 will be on campus for this year’s activities. A calendar listing all the events of homecoming will be in the mailboxes sometime next week.

Frosh Apply For Seminar At Newberry
Students of the class of 1967 are eligible to apply for the 1967 spring session of the Newberry Library seminar in the humanities of the Associated Colleges of the Midwest.

Each year the seminar concentrates on a general chronological period within western civilization in order to bring together a group of scholars with a broad common interest.

This year’s seminar will concentrate on the Renaissance by working with the vast resources of the Newberry Library in Chicago.

Topics for future seminars include the seventeenth century, the age of enlightenment and revolution, and the nineteenth century.

This year’s internationally known scholar in residence will be Dr. Deane Ray, professor of the University of Edinburgh and editor of the "English Historical Review." Faculty members drawn from ACM colleges will include John Murray, professor of English history at Goo college and Richard W. Van Fossen, professor of English literature at Cornell college.

Other instructors will discuss the Low countries, France, Italy and Germany.

Housing for the participants in the program will be in nearby apartments, owned by the Newberry Library. Lawrence students in the seminar will pay the same tuition as they would for the term at Lawrence.

Interested students may obtain more information from Dr. Walter Peterson at 425 Main hall. Applications must be postmarked no later than Saturday, Nov. 20.

Church Examines Position Of Computer At Lawrence

JOHN O. CHURCH, director of the computer center, addressed a science colloquium Tuesday, Oct. 19, on "Why Not Computers at a Liberal Arts College?" Church reviewed the role of computers in scientific research, factorizing, scientific research, all-defense, space exploration, and designing computers.

He pointed out that today's computer's can play blackjack and slot machines or war games and management decision games.

The use of the computer is expanding in all areas of science, business, industry and education and this trend is not expected to stop. Everyone is affected by the computer. It is vital that people be informed and understand the concepts, new applications and implications of these machines.

The challenge to educators is to be aware of changes in the technical world and to inform their students. Church suggested that "the liberal education of every student include something about the computer."

The computer itself can perform only one operation at a time. The organization of these operations for a desired result is a program. Church pointed out that "without a program, the computer is black box and brings him closer to a real understanding of the computer's

Representative To Discuss Seminar

A GROUP of 200 chemistry teachers visited the Lawrence campus last weekend. They inspected facilities in Youngchild hall and discussed the merits of the freshman studies program as a function of the liberal education.

A specific program was developed for Ben R. Schneider, as- sociate professor of English, who had collected 27,000 pieces of data about performances on the London stage in the late seventeenth and early eighteenth centuries.

The computer can use this program, answer such questions as "What was the repertoire of all the actors on the London stage during this period?"

A government department here project analyzed the United Nations voting record at a country to determine which dogma it was following.

A student interested in music had a program to generate random notes and meters. This led to a program which generated a musical score for four pieces which finish at the same time. Before the computer can be used, the programmer must analyze the problem, flow chart the operations in symbolic diagrams and code the flow chart into FORTRAN. Another program translates this into the machine's own language.

An institution like Lawrence has an advantage over large institutions because it can permit the student access to the machine and peripheral equipment.

Church stated that "the computer is important in that it helps to destroy the myth of the omnipotent black box and brings him closer to a real understanding of the computer."

Folk Singers Ian and Sylvia Open Homecoming Events

IAN AND SYLVIA, Canadian folk singers, will open the 1965 Homecoming weekend with a concert at 8 p.m. Thursday, Oct. 28, in Memorial chapel. Their repertoire includes English and American classic ballads, mountain music, Negro blues, cowboy ballads and French Canadian songs.

In reviewing their record "Four Strong Winds," the New York Times commented, "Folk singers . . . could hardly find a more tasteful model than the work of Ian and Sylvia."

Noted for their ability to judge song quality, they often experiment with a song that "seems right" for them until their voices, accompaniment, pacing and emotions reach polished unity.

THE PAIR has done concert tours, dramatic roles on the Canadian television network and nightclub engagements. They have appeared on Hootenanny and the Bell Telephone Hour.

Ian grew up on a British Columbian farm where he took part in rodeos. He studied fine arts in college, but his real interest was music.

After graduation he took small singing jobs wherever they were available and studied with Roy Guest when that noted English folk singer toured Canada.

APART from a few piano lessons from her mother in Chatham, Ontario, Sylvia learned folk music on her own. She has done research in folk music and has a special fondness for the songs of Elizabethan England.

Tickets are on sale at the Lawrence university box office in the Music-Drama center. Prices are $5, $2.50 and $2.25.

Two Brass Groups Assist Dale Duesing In Baritone Recital

Dale Duesing, a conservatory junior, will present a public recital at 2:30 p.m. Friday Oct. 29, in Harper hall, at the Music-Drama center. He will be assisted by two brass ensembles.

Duesing, a baritone, is a student of Mari Taniguchi, associate professor music. His program consists of Cantata No. 82, Ich habe genug, by J. S. Bach; Phidyle, by Duparc; Don Quichotte A Dulcinee, by Ravel; and operatic selections from Tannhäuser by Wagner, and Andromache, by Giordano.

Assisting in the performance is a trombone quartet including Stephen Drews, Christopher Cone, Keith Osterman, and Mark Gerard, who will play Three Equali, by Beethoven. The trumpet trio consisting of Edward Hoffman, David Ridgely and Douglas Gruehn, will perform Sonatina, by Donato.

The brass players are from the studio of Dr. Edgar M. Turpentine, associate professor of music.

Roberts Explains Aims Of Visitors Program

By MARY BETH HAASE

EVERY FALL Lawrence plays host to a hundred or more high school students who are considering spending their college years here. "We feel this is a benefit to both the prospective students and the school," Edward J. Roberts, director of admissions, said in an interview Monday.

"They find out if Lawrence will be a "good fit", if they like the campus atmosphere and can feel at home here, in turn, we get a chance to look them over," said Roberts.

Roberts congratulated the Prospective Student committee for its role in familiarizing the visitors with the campus. "We have received many compliments from prospective students and their parents on the sincere interest and friendliness of the students involved in this program. They are doing a very good job."

The Prospective Student committee is reportedly active this term. Using his appointment book as evidence, Roberts noted that more than 31 prospective high school interviews this weekend alone.

He explained that "our heavy load of interviews in the period through January, although many come later in the spring after letters of admission have gone out."

He was asked if the current housing situation — upperclass students living in the Plantz — was presenting difficulties for the prospective student program.

His reaction was that the problem is not as great as it may seem since "only ten percent of the students who visit ask to stay in the upperclass housing."

He added, "although there are no facilities now for the girls, we still have room for seven boys each weekend, since only one student is living in the prospective student room."

He said that the University is considering provisions for visiting students.

Roberts went on to explain other accommodations that if they have a friend on campus with whom they can stay, they will provide them with a meal ticket. Many admissions offices plan on staying at the Conley hotel.

The admissions office doesn't have the problem of accommodations to keep students from visiting the campus. They feel the advantages of coming as a prospective student are great.

ASTROPHYSICS
The Impact of Quasars
by WALDO CRUZ

THE DISCOVERY of quasi-stellar radio sources has precipitated a revolution in the thought of the world's astronomers and astrophysicists. Quasi-stellar radio sources — nicknamed quasars — are these dim, once unnoticed points of light scattered among the stars, which for some unknown reason are radiating an energy so immense complete defiance of known laws of physics.

For quasars actually appear to possess so much energy that the universe itself may be nothing more than a giant quasar.

It has been estimated that each quasar produces more electromagnetic radiation than would come from converting 100,000 to 500,000 billion, or ten to a hundred times the energy output of the sun. No known process, however, can explain such enormous amounts of energy.

Although some astronomers have been in a quandary over this contradiction, they have been faced with imaginative theories which have attempted to explain the facts of nature by affecting the basic concepts of the universe.

Currently two theories on the creation of the universe are being discussed: the "big bang" theory and the "steady-state" theory. The big bang theory asserts that the universe began as a singularity, or instantaneous point of singularity from which all time and space are expanded.

The steady-state theory holds that matter is being created continuously out of energy and that the universe has always been much the same as it is now. ONE OF THE WORLD'S MOST

The Impact of Quasars
by WALDO CRUZ

THE DISCOVERY of quasi-stellar radio sources has precipitated a revolution in the thought of the world's astronomers and astrophysicists. Quasi-stellar radio sources — nicknamed quasars — are these dim, once unnoticed points of light scattered among the stars, which for some unknown reason are radiating an energy so immense complete defiance of known laws of physics.

For quasars actually appear to possess so much energy that the universe itself may be nothing more than a giant quasar.

It has been estimated that each quasar produces more electromagnetic radiation than would come from converting 100,000 to 500,000 billion, or ten to a hundred times the energy output of the sun. No known process, however, can explain such enormous amounts of energy.

Although some astronomers have been in a quandary over this contradiction, they have been faced with imaginative theories which have attempted to explain the facts of nature by affecting the basic concepts of the universe.

Currently two theories on the creation of the universe are being discussed: the "big bang" theory and the "steady-state" theory. The big bang theory asserts that the universe began as a singularity, or instantaneous point of singularity from which all time and space are expanded.

The steady-state theory holds that matter is being created continuously out of energy and that the universe has always been much the same as it is now. ONE OF THE WORLD'S MOST
HAILELUJAH the Hills," a 1963 American comedy, will be the Film Class's presentation this Sunday. "Hailelujah" was directed by Adolphus Melvian, a member of the Film Class staff. It is one of several films that has received considerable acclaim and has won numerous awards.

The film tells the story of a young American named Joe who comes to the Swiss Alps to join his uncle, a mountain climber. Joe is fascinated by the beauty of the mountains and decides to become a mountain climber himself. However, his uncle's mountain climber career has been ruined by his injury, and he is now a mountain guide. Joe must prove his climbing skills to his uncle and the other climbers if he wants to join their team.

The film is a great example of the importance of maintaining a healthy lifestyle and the importance of being persistent. Joe's uncle, who has given up on his climbing career, is inspired by Joe's determination and perseverance. The film is a great example of how important it is to never give up on your dreams, no matter how difficult they may seem.

The film also highlights the beauty of the Swiss Alps, and the importance of preserving the environment. The film shows how the beauty of the mountains can inspire people to do good things, and how the natural world can be a source of inspiration and beauty.

In conclusion, "Hailelujah the Hills" is a great film that demonstrates the importance of maintaining a healthy lifestyle and the importance of being persistent. The film is a great example of how important it is to never give up on your dreams, and how the beauty of the natural world can inspire people to do good things.

Vikings Remain Undefeated, Edge Knox Siwashers 14-10

VIKE COACH Ronald D. Roberts was warned to buck up and wait some more. But they did and a fourth quarter touchdown to pull out a 14-10 victory over Knox.

DEAN, Ripon 0 1 6 29
Levinson, Carleton 5 0 0 30

Bradley, Ripon 6 0 0 36
Coe ......................... 1 3
Knox ..................... 0 4
Monmouth ............. 2 2

Lawrence ............. 4 0
All day to take second place being the costliest mistake of the day. Knox was stopped at the Lawrence eight-yard line.

KNOX ............................................. 0 3 7 10

The team being able to mount a sustained drive. Toward the end of the second quarter, the only touchdowns and Gatzke is second with six.

LAWRENCE .................. 0 7 7-14
KNOX .................. 0 3 7 10

Lawrence offense rolled to 315 yards to take second in team offense, with far and away the best rushing attack.

LAWRENCE .............. 0 7 7-14
KNOX .................. 0 3 7 10

Knox: Field-goal, Wiedow, 21 yards.

Lawrence: McKee, 14-yard run, (Hietpas, kick).
Knox: Seder, 48 yards, intercepted pass (Wied, kick).
Lawrence: Gatzke, 1yard run, (Hietpas, kick).

Sideline Highlights

BY RODNEY A. CLARK

For the past five years, soccer has been played as a physical education class and has recently become the Lawrence soccer club. Over this span, support for the sport has diminished and players have begun to envision soccer as an intercollegiate sport, with all the benefits an intercollegiate sport offers.

The athletic department does not, however, see the issue the same way. While soccer club feels it has sufficient numbers on an intercollegiate level, the athletic department, besides disagreeing on this point, finds several other problems standing between the Lawrence soccer club and an intercollegiate Lawrence soccer team.

By Tim Parker, one of the student coaches for the soccer club, feels somewhat differently: "Ever since I have been at Lawrence, I've been trying to get the soccer program increased.

"We think that the soccer club is as well off now as we could make them even if they were on a different level. If they were on a different level, they would not be able to use freshmen for the team. Budget-wise, we can't handle both the expense of uniforms and traveling right now.

"Besides, our coaching staff is fully occupied during the fall and there is little chance of stepping up the program without a coach."

The athletic department has, it seems, two valid points: the lack of support and the lack of adequate supervision. If soccer does continue to grow, possible there would be the kind of interest needed to support a team.

Also there is a problem of procuring a coach. Sgt. Lucas is doing a fine job but would have trouble handling a soccer team. The only solution seems to be for the soccer team to buck up and wait some more."

DELTEN DOREs Bob Gilbert and Bob Rand line up defensively against the Fijis in last week's interfraternity football game. The Delts won 8-2 thanks to their stalwart defense, thus bringing their record to 2-2.
