Admimistrates welcome new students

The Lawrence administrators offer several pieces of advice to the new students. "Always do your best in what you do," said President Smith. "We want you to be proud of the university by the time you graduate."" I think that being an effective student is important," said Frothingham. She added that the students should try to "make the most of their time here and not waste it." "It's important to take advantage of all the resources available," she continued. "The Lawrence campus is home to a variety of organizations and events, and it's up to you to take advantage of them." -- Laura Horan, Assistant Professor of Philosophy

LU Pros vacationed very much during the summer

What do Lawrence professors do for the summer? Many of them use this time to travel or pursue their research interests. "I use the summer to catch up on my reading," said Frothingham. "I also like to take some time to relax." -- Laura Horan, Assistant Professor of Philosophy

New GRE's for seniors in fall testing

The Lawrentian is reporting that the GRE for seniors is being offered in the fall. "This is a great opportunity for seniors to take the test," said Frothingham. "It's a good way to prepare for graduate school." -- Laura Horan, Assistant Professor of Philosophy

You're educated, right?

Learning is often called a life long experience, because forgetting is also a life long experience. Try this quiz for former school kids, prove to yourself that retention is one of your strong points. Answers are on page three.

1. What are the other eight planets orbiting the sun?

2. Hawaii and Alaska were two of the states added to the Union, but which state was the 36th?

3. What is the speed of light?

4. Which two of the following words are misspelled, hurried, auxiliary, efficiency, occurred, current?

5. During the Civil War, who was the president of the Confederacy?

6. What is the fastest animal on the ocean, the earth, or the air?

7. What is the world's largest organ?

8. What are the points where the sun crosses the equator for the first time?

9. What country gave us the telephone and the movie industry?

10. What country gave us the telephone and the movie industry?

11. We have collective names for animals, such as a flock of sheep, a gaggle of geese and a school of fish. What is the collective name for quadrupeds?

12. Name the 11 members of President Carter's Cabinet and their positions.

Lawrentian Scores Off-Campus

The Lawrentian is awaiting its new rating from the College Press. In the most recent edition of THE LAWRENTIAN, the Lawrentian received a second class rating in competition with other papers across the country. The single highest score was for the printing, however, our paper also scored high for its front, editorial and sports pages. Several individuals have received notable mentions for their efforts. Frothingham was noted for her "considerable knowledge of Apple." Ben

The Lawrentian is awaiting its new rating from the College Press. In the most recent edition of THE LAWRENTIAN, the Lawrentian received a second class rating in competition with other papers across the country. The single highest score was for the printing, however, our paper also scored high for its front, editorial and sports pages. Several individuals have received notable mentions for their efforts. Frothingham was noted for her "considerable knowledge of Apple." Ben...
The Professor and the Boy

The two intellectually all there is, scholarly office and bedroom, books surround, Mozart plays, the professor leans back, distant and detached. The boy, the seed of dust and sand, lays across the bed, and, in ignorance among professors, and creates that ironic gaze into black night.

But there is the power of bulky intellect, the iron clad belief in your own convertor matter, unconsciously, and unseen particles of thought, like dust, into something visible.

The professor leaves, after talk of Camus, and drives to meet Mishima, hears the Sound of the Waves and thinks about said and said, and the dust. They, too, then became separated as the boy writes on the scholar's desk, amidst books, ink, sales and manuscript, of dust, guilt, and mountains of knowledge. The boy sees himself as an ant of existence is his ocean, the professor is further submerged.

They aimed for Flash Gordon, but the naive audience was over. Although we both thought that we were doing it, we actually they mean to help you. Don't get anxious about things. Get involved instead, in the ideas, the dorms and everything that Lawrence has to offer.

As Kisker says, "If you don't get involved, you are doing yourself a great disservice."

—CAROL REES

MOVIES

The audacity of some people! Inaugurate a more school newspaper taking on the self-proclaimed biggest film of 1977. But why not?

Mozart plays the violin, and the professor is further involved in adventurous exploration, emerging from the surface. The princess is miserable, as the professor is further involved in adventurous exploration, emerging from the surface. The princess is miserable, as the professor is further involved in adventurous exploration, emerging from the surface. The princess is...
**Coaching Roberts returns**

Will history repeat itself? That is the question head football coach Bob Roberts and his staff are trying to answer.

When Roberts was off-campus in 1979 to complete work on his doctorate, he returned to find that Lawrence's football fortunes, especially the size of the team, had plummeted.

Several key players and season kickoff injured Roberts and his staff couldn't get the offense "over the hump." In the past three seasons, however, the football team has lost only five games and won the conference championship in 1979.

After Roberts' sabbatical last year, he has again returned in what could be his final year as coach. Freshmen were added to the team. And a key injury that threatened graduation and injuries, has cut into the player total. But, there is some reason to think the offense may not be "over the hump." Although the Viking backs have been slowed, nine first-time starters, all Conference place kicker, four players who started at least one game each and a large group of sophomore give the Vikings some reason for optimism.

Heading the defensive squad are co-captain Mike Powers, '80, Dave Fonschok, and Tim redundant, '80, in the defense, backfield; tackle Bob Eddy, '79 and end Kyle Orton; '79, '80, line; and linebackers Bob Neukom, '79, and Greg Lin- nemanston, '80, at linebacker spots.

The offense unit has the three up receivers back from 1978, co-

captain Ben Wapet, '78, who set a new receiving yardage record and just missed records in recep-

tions and touchdowns scored receiving, wingback Paul Scott, '79, and Paul Cebert, '79.

Anchoring the line will be center Frank Boren, '77, a two-time high school All-American and an All-Midwest Conference honoree, and tackle Clay Tealdean, '78. Also returning on offense will be Bob Stevens, '79, last season's third stringer.

The big question on the off-

dense is in the quarterback spot. Sophomore Jim Peran, was backup last season and is the leading contender for the spot, but Fonschok was a top high school quarterback and Stevens also may be given a chance.

Lawrence will also be able to turn to place kicker Jeff Counts, '79, who won the high scoring in Lawrence placeholding record and his career conversion rate in field goals, 29 of 46, put him near the top in the NCAA Division III.

"I like to go into a season op-

timistically," he added, "but being realistic, this may have to be termed a "rebuilding' year for the Vikings."

But, the Viking Coach hopes, not the beginning of a downward swing in Viking football.
To study this ancient text, one must turn to the pages of The Lawrentian, the university newspaper. An essay on the topic of lead poisoning is featured, written by John Doe, a student at the university. The essay discusses the effects and causes of lead poisoning, with emphasis on the impact on both children and the environment. The author also explores the historical context and the ongoing struggle to address this issue. The piece concludes with a call to action for readers to learn more and take steps to protect themselves and others from lead exposure. For further reading, the essay recommends consulting the university's health and safety guidelines and staying informed about the latest research on lead poisoning.
