TRAGEDY

(Late evening upon the latest academic discovery)

I kissed her. Instantly I found
My arms were numb; my head went round.
For weeks of courtship I had won
One kiss. A wish and it was done.
What impulse led me to this deed
I have not. I know not. (I am guaranteed):
The girl I wanted for my wife
Has cut three minutes off my life
(O Happy Death!!!)

--Exchange.

Our current seeker after truth, in
Investigating the facts about the shore-
Nameless discovery, says emphatically
That each man does not take these
Minutes off one's life. After investigating
Himself, and questioning forty-six unsuccessful deaths
And sage parlor-hounds, he has come to
The conclusion that 10% of the
Student body should have been dead
Years ago.

Mister: "Peach, Hope, and Love
Those three; and the greatest of
These--"

Student: "Is what puts an end to
Many a college career."

One of our exchanges quotes Dr.
Crane as saying, "Nothing ideas isn't
Enough."

But hothooks, even in fraternity houses aren't built large enough for
ten boys.

At a certain Vermont school, the
Fire-escape on the girls' dormitory fell
Down. Five men were injured.

More than 60 per cent of the mechanical
equipment used by American industry is applied
through electric motors. But the electrification
of the tasks performed by man power has
hardly begun. Electric power not only saves
dollars; it conserves human energy for
better purposes and raises standards of
living. College men and women may
well consider how electricity can lessen the
burdens of industry and of farm and home life.
