The affair has been planned by Dr. Wilson S. Naylor in the science building. Free Speech

Several weeks ago, Oregon Agricultural College and two or three southern universities broke into print rather widely, particularly in student publications such as the New Student, by their refusal to allow speakers with pronounced radical social views to fulfill lecture contracts at the institutions. In the case of O. A. C., the speaker, a man, was barred from the college platform because he saw no wrong in women smoking and held other rather liberal social views.

To prohibit speakers from delivering a lecture is a violation of certain faculty minds, is a bit of childish nonsense. In the first place such action brings little or nothing but glaring publicity and criticism. To prohibit speakers from delivering a lecture is a violation of the First Amendment, that is, of free speech, as long as they say anything which is not detrimental to society and government. Little or no restriction is placed upon the type of reading students often endorse them. The colleges involved in the recent prohibition of speakers from delivering a lecture is a violation of the freedom of the press.

In conclusion, let me say that the colleges involved in the recent prohibition of speakers from delivering a lecture is a violation of the First Amendment, that is, of free speech, as long as they say anything which is not detrimental to society and government. Little or no restriction is placed upon the type of reading students.

Hope for Students

The belief that youth is the happiest time of life is founded on a fallacy, says William Lyon Phelps in a book called "Happiness." He explains that man was made to grow, to lead an ever-advancing and expanding life; and that the older one grows the happier he ought to be.

That remark to a college man is like a crumb of bread thrown down the walk that leads from Main Hall. That guy an artist? Why, he couldn't draw blood.

THE LAWRENTIAN
Published every Tuesday and Friday during the college year by The Law-
rehtian Board of Control of Central Colleges, Appleton, Wis. Notice to Wisconsin Intercollegiate Press Association.

Our President, Professor John F. Van Meter, has directed that this edition of the Easterner be devoted to a subject of great interest to students and faculty. The students of the University have been asked to submit their ideas on the nature of the college press as an institution. The following are the results of their efforts:

'The college press is a means of communication among the students of the college. It is an important part of the college life and should be given adequate attention by the college administration. It is a means of expression for the students and should be free from censorship. The college press should be an instrument for the dissemination of knowledge and the promotion of culture. It should be a means of fostering the spirit of cooperation among the students and the faculty. It should be a means of promoting the interests of the college and its students. It should be a means of fostering the development of critical thinking and the spirit of inquiry. It should be a means of promoting the interests of the college and its students.'
