Hutcheson Scores Modern Education In Neenah Address

Many Lawrenceans Hear President of University of Chicago

Claiming the present system of education does not accomplish its purpose, Dr. Robert Maynard Hutchison, president of the University of Chicago, severely criticized the present educational system in an address before the Parent-Teachers Association at Lawrence College Monday afternoon.

Dr. Hutchison reminded the audience that he and his wife had visited Lawrence and that they had been moved by the academic standards of the institution.

Dr. Hutchison concluded his address with the statement that education should be an engine that will move people into life instead of being just a starting point.

Colonial Banquet Crowds Sees Four Best-Loved Girls

Margaret Gilfe, Florence Bertram, Jean Schram, Helen Wilson Chosen

When Lawrence's four best-loved senior girls, dressed as George and Martha Washington, and James and Dolley Madison, danced into the tenth annual Colonial Banquet hall last evening in the strait of Mr. Arthur's Minuet, they were identified by Helen Wilson, Margaret Gilfe, Florence Bertram, and Jean Schram.

Margaret Gilfe, president of the Lawrence Woman's Association, announced that the Miss Paul Ferguson, vice president of the Woman's Association, had been selected as chairwoman for the event.

Young Baritone On Artist Series Wednesday Night Nelson Eddy Stops at Lawrence Chapel on Fourth American Tour

Nelson Eddy, the young American baritone, is making his fourth concert tour this season. He is a tall, blonde, good-natured man, with a remarkable beauty that is described as "compelling." He has had much experience in the stage and screen plays, as well as on the serious music scene. His "Werther," and "Rahab" have made him a favorite with audiences.

Since 1930, Eddy has had much experience in the field of opera and concert, operas, oratorios and recitals. His performances have been widely praised, and his voice is considered one of the most beautiful in the world.

Eddy's tour will include performances in New York, Boston, Chicago, and Los Angeles, among other cities. He will be accompanied by a large orchestra, and his concerts will be held in some of the finest concert halls in the country.

Nelson Eddy
Capable of opus, oratorio, or concert...
Interesting Works

- When the social swing has become a driving force behind the success of an entertainment establishment, it can be a sign that the establishment is reaching new heights. The stay of the famous opera singer Edith Robinson at the Hubert Hotel on Monday evening was a clear indication of this. The opera singer was accompanied by her husband, Dr. Frank B. Robinson, a well-known medical writer. The couple were received with great enthusiasm by the hotel guests and were the center of attention during their stay.

Bird Lore Carries

- Mrs. Ogden's Lists

- Bird of the month is the Red cardinal, a small songbird with a bright red plumage. It is found in the southeastern United States and winters in the southern parts of the country. The bird is known for its beautiful singing, which can be heard throughout the day.

Birds of the World

- Among the unusual interesting works that have been added to the library recently are several volumes on birds. These include "The Birds of North America," a guide to identifying birds found in North America, and "The Birds of Europe," a comprehensive guide to European birds. The library also has a number of books on bird migration, including "The Migration of Birds," which discusses the various factors that influence bird migration.

Birds at the Zoo

- The zoo has recently added a number of new birds to its collection. These include a pair of red-tailed hawks, a group of snowy egrets, and a flock of red-winged blackbirds. The birds are being well cared for by the zoo staff and are a popular attraction for visitors.

Birds in the Wild

- The library also has a number of books on birds in the wild, including "The Birds of the Hawaiian Islands," which describes the unique bird life of the islands. The library also has a number of books on birds in the United States, including "The Birds of North America," which is a comprehensive guide to the birds of the United States.

Birds in Flight

- The library has a number of books on birds in flight, including "The Birds of Flight," which describes the various techniques used by birds to fly. The library also has a number of books on birds in the air, including "The Birds of the Air," which discusses the various bird species found in the air.

Birds in the Sky

- The library has a number of books on birds in the sky, including "The Birds of the Sky," which describes the various bird species found in the sky. The library also has a number of books on birds in the air, including "The Birds of the Air," which discusses the various bird species found in the air.

Birds in the Water

- The library has a number of books on birds in the water, including "The Birds of the Water," which describes the various bird species found in the water. The library also has a number of books on birds in the ocean, including "The Birds of the Ocean," which discusses the various bird species found in the ocean.

Birds in the Forest

- The library has a number of books on birds in the forest, including "The Birds of the Forest," which describes the various bird species found in the forest. The library also has a number of books on birds in the woods, including "The Birds of the Woods," which discusses the various bird species found in the woods.

Birds in the Desert

- The library has a number of books on birds in the desert, including "The Birds of the Desert," which describes the various bird species found in the desert. The library also has a number of books on birds in the dunes, including "The Birds of the Dunes," which discusses the various bird species found in the dunes.

Birds in the Mountains

- The library has a number of books on birds in the mountains, including "The Birds of the Mountains," which describes the various bird species found in the mountains. The library also has a number of books on birds in the valleys, including "The Birds of the Valleys," which discusses the various bird species found in the valleys.

Birds in the Arctic

- The library has a number of books on birds in the Arctic, including "The Birds of the Arctic," which describes the various bird species found in the Arctic. The library also has a number of books on birds in the tundra, including "The Birds of the Tundra," which discusses the various bird species found in the tundra.

Birds in the Antarctic

- The library has a number of books on birds in the Antarctic, including "The Birds of the Antarctic," which describes the various bird species found in the Antarctic. The library also has a number of books on birds in the ice, including "The Birds of the Ice," which discusses the various bird species found in the ice.

Birds in the Rainforest

- The library has a number of books on birds in the rainforest, including "The Birds of the Rainforest," which describes the various bird species found in the rainforest. The library also has a number of books on birds in the jungle, including "The Birds of the Jungle," which discusses the various bird species found in the jungle.

Birds in the Savanna

- The library has a number of books on birds in the savanna, including "The Birds of the Savanna," which describes the various bird species found in the savanna. The library also has a number of books on birds in the grassland, including "The Birds of the Grassland," which discusses the various bird species found in the grassland.

Birds in the Rain

- The library has a number of books on birds in the rain, including "The Birds of the Rain," which describes the various bird species found in the rain. The library also has a number of books on birds in the wetland, including "The Birds of the Wetland," which discusses the various bird species found in the wetland.

Birds in the Snow

- The library has a number of books on birds in the snow, including "The Birds of the Snow," which describes the various bird species found in the snow. The library also has a number of books on birds in the winter, including "The Birds of the Winter," which discusses the various bird species found in the winter.

Birds in the Summer

- The library has a number of books on birds in the summer, including "The Birds of the Summer," which describes the various bird species found in the summer. The library also has a number of books on birds in the spring, including "The Birds of the Spring," which discusses the various bird species found in the spring.

Birds in the Fall

- The library has a number of books on birds in the fall, including "The Birds of the Fall," which describes the various bird species found in the fall. The library also has a number of books on birds in the autumn, including "The Birds of the Autumn," which discusses the various bird species found in the autumn.

Birds in the Winter

- The library has a number of books on birds in the winter, including "The Birds of the Winter," which describes the various bird species found in the winter. The library also has a number of books on birds in the cold, including "The Birds of the Cold," which discusses the various bird species found in the cold.

Birds in the Heat

- The library has a number of books on birds in the heat, including "The Birds of the Heat," which describes the various bird species found in the heat. The library also has a number of books on birds in the summer, including "The Birds of the Summer," which discusses the various bird species found in the summer.

Birds in the Desert Heat

- The library has a number of books on birds in the desert heat, including "The Birds of the Desert Heat," which describes the various bird species found in the desert heat. The library also has a number of books on birds in the hot, including "The Birds of the Hot," which discusses the various bird species found in the hot.

Birds in the Cold Heat

- The library has a number of books on birds in the cold heat, including "The Birds of the Cold Heat," which describes the various bird species found in the cold heat. The library also has a number of books on birds in the winter, including "The Birds of the Winter," which discusses the various bird species found in the winter.

Birds in the Rain Heat

- The library has a number of books on birds in the rain heat, including "The Birds of the Rain Heat," which describes the various bird species found in the rain heat. The library also has a number of books on birds in the wet, including "The Birds of the Wet," which discusses the various bird species found in the wet.

Birds in the Snow Heat

- The library has a number of books on birds in the snow heat, including "The Birds of the Snow Heat," which describes the various bird species found in the snow heat. The library also has a number of books on birds in the icy, including "The Birds of the Icy," which discusses the various bird species found in the icy.

Birds in the Summer Heat

- The library has a number of books on birds in the summer heat, including "The Birds of the Summer Heat," which describes the various bird species found in the summer heat. The library also has a number of books on birds in the hot, including "The Birds of the Hot," which discusses the various bird species found in the hot.

Birds in the Fall Heat

- The library has a number of books on birds in the fall heat, including "The Birds of the Fall Heat," which describes the various bird species found in the fall heat. The library also has a number of books on birds in the autumn, including "The Birds of the Autumn," which discusses the various bird species found in the autumn.

Birds in the Winter Heat

- The library has a number of books on birds in the winter heat, including "The Birds of the Winter Heat," which describes the various bird species found in the winter heat. The library also has a number of books on birds in the cold, including "The Birds of the Cold," which discusses the various bird species found in the cold.
WASHINGTON: As a pioneer was the self-imposed name of Sergeant George Washington. He was, like the great national leader, born on February 22.

Washington lived in primitive years, where he showed his courage in his long fight to overcome indifference in the public mind. The realization that it was necessary to make a change was a long and difficult one. It was not until after a series of losses and delays that a direct and orderly, skillful retreat before the British was decided upon.

As the first president of the nation and later of the Commonwealth, Washington served with skill and distinction until the day he died. He was a man of great capacity for accomplishment, cool in defeat and indomitable. He proved himself nobly, as a military leader and as a statesman, in every capacity.

In his death, Washington left a legacy to the nation which is still being utilized to the nation's advantage.

Human capacity is infinite, and we are always being tested to see if we can do more, if we can increase our efficiency. The United States and Canada, united in the fight to overcome indifference in the public mind, have a task to do. They must be more efficient in their work.

Former Student Composes Music

Russell Danbury Gains National Recognition As Composer

Bruce Thayer, a former student of this institution, has gained national recognition as a composer. He has composed a piece of work in carrying on after the lines laid out by him are still given in the field of music.

The Student Senate elections, which is Offered in Our Fabric Section

The Student Senate elections were held on October 2, 1933. The balloting was conducted by the Student Senate, Sunday afternoon, at the Lawrence Student Body in recitals and concerts under the direction of Paul White. This same group, under the leadership of Paul White, was played in the thirteenth season of the University of Michigan, and is referred to in a picture caption in the Lawrence Student Body.

The present officer of the All-College will continue to serve as members of the Student Senate; they are: Treasurer: Thomas A. Trenary, editor; Raymond J. Henry, editor-in-chief; Elizabeth P. Johnson, editor; and Norman Clapp, treasurer.

Hoffman to Teach Business School

Curt Hoffman, instructor in economics, has been appointed to teach business at the Biological Station of the University of Michigan in the 1933 summer session. He is also a member of the biology faculty.

Washington was courageous and cool in defeat, he showed his courage even when the odds were against him.

Freshman Quintet

Defeats Ripon Squad

The Lawrence fresh won their first game in conference last Monday, but in the conference, however, Lawrence won by a score of 24 to 18. Law was very ragged by both teams, but in the conference Lawrence won by a score of 24 to 18. After the first few minutes the frosh reached its peak Monday night. The score would probably have been six to two if the Law defense had not been as much as it was. As it was, the score was six to two at half time, 16 to 9. After the ripon team did not show the passing game of the frosh very well, the frosh lead at halftime, 16 to 9.

Victory Over Ripon

Lawrence Ties for Second Position

Lawrence went into a tie for second place in the Midwest conference by tying Ripon Monday night, 28 to 20. Beloit and Lawrence are now tied with four victories and two losses, either Beloit or the Vikings will drop out of the running after tonight.

The Ripon team did not show the brand of football that Lawrence is known for. However, there were times that the Lawrence defense relaxed, but with Ripon falling to do much fighting the Law offense wasn't very good.

Smooth Passenger

Delightfully

The Vikings presented an improved picture Monday night. The team had to rely on precise passing to keep up the running.

In the second quarter, there were times that the Lawrence defense relaxed, but with Ripon falling to do much fighting the Law offense wasn't very good.

Mrs. Gilkey at Colonial Banquet

CONTINUED FROM PAGE 1

and. She was a woman of a very high standard of personal appearance. She had excellent taste in clothes, and those who knew of her style always gave her the highest praise for her elegant clothing.

“Mrs. Gilkey was a very special type of woman,” said a friend. “She was known for her impeccable taste and her attention to detail. She was always well-dressed and gracefully poised.”

After the celebration, the guests gathered in the library for refreshments. The atmosphere was warm and inviting, with soft music playing in the background. Mrs. Gilkey was everywhere, conversing with everyone and laughing heartily.

The evening ended with a toast to Mrs. Gilkey’s many accomplishments and her contribution to the community. The guests parted ways, but the memories of the evening would stay with them for a long time to come.”

The Library Receives Copy of Collection of Foster’s Works

The Library has just received a collection of the works of Stephen C. Foster, the well-known American composer. The set is a complete and carefully arranged edition, and includes all the works of Foster, his compositions, his arrangements of his own work, and his arrangements of the work of others.

The collection is the result of much painstaking investigation. The works are arranged in possible, to fair representations of the first editions of the works. These were searched out in the Library of Congress and in other libraries where they are available.

Although not available, the reproductions are the best copies. If, in the future, the original collections are required, they are to be sent to complete the reproduction.

About one thousand copies of the collection have been printed on a specially made rag paper, and sent to reference libraries located in other parts of the country.

The collection is a comprehensive and valuable musical library, and to music lovers and scholars alike, a most valuable possession.

Display Illustrates Radio Art Program

A Copy of the exhibit has been arranged on the main desk at the University of Wisconsin to illustrate the Art in America radio program which is to be broadcast Saturday evening at 7 o’clock over WIZL. Several reproductions of Cupper’s pictures have also been placed above the current periodical rack.

John Singleton Cupper was the outstanding editorial American painter. His earlier portraits, several of which were done before he was sixteen, back the hall of his later European works, but the "black-tailing" portraits are his best known.

Durbridge’s Stolen

Car is Recovered

Delta Iota’s sophomore, Robert Durbridge, had his Chevrolet Coupe stolen about 8:30 yesterday morning from 1409 Wisconsin Avenue, just a block from Courts where the University Women’s Basketball team was playing.

The car was one of the most popular in the campus, and the loss of such a valuable property was keenly felt by many students.

Durbridge, who had recently bought the car, was shocked and distressed when he learned of the theft. He immediately reported the matter to the police, who promised to do all they could to recover the car.

Rising Prices Mean Nothing to Students

In U. Coo House

Students living in the men’s and women’s co-operative houses at the University of Wisconsin aren’t worried about price, according to Pres. Rees’ controlled inflation program and the resulting general rise in prices.

Because in spite of the rise in prices during the last six months, the students are getting both their board and room in the University’s co-operative houses, as were in September, they were paying a rent which was about the same as the current high of $50.60, the CWA, rising gold prices, backers and the need of students to have more room available.

Located within a block of the campus, two men’s co-operative houses were established by the University two years ago, to reduce the cost of living for students, and are attended by many students.

The houses are occupied by the direction of J. D. Phillips, business manager, and are directly under the management of competent managers. Students have double rooms and eat in the dining hall.

The civil war of last week was the necessary result of a long chain of historical and material events. The Treaty of St. Germain, which dissolved the Austria-Hungary Dual Monarchy created an independent state of Austria, but an independent state cut off from many of its industries, sources of raw materials, economic competition, and international cooperation. As a result, Austria was left economically weakened. But the future of the country lay ahead, dependent upon the decisions of its political leaders.

The final conflict came with the dissolution of the Social Democratic parties of Germany. The Social Democrats, which served to strengthen the Fascist movement, were discredited by the spread of Communism in the country. The disgraceful tactics which have served to divide the Socialists, and the failure of the Social Democratic parties of Germany to carry on, organized the Schutzband for the defense of their advanced social policy and re-establish the Christian Social Party and the Trade Unions, which served to strengthen the Fascist movement. The struggle against Fascism cannot be waged by the method of opportunity and wishing for peace.

Excerpts:

"From my small experience, Socrates, I would say that you are defining an ideal scholar and an ideal university, for, if we examine that matter, not only our education, but the entire society, is set up a dualism between curricular and extra-curricular activity. One is the conventional educational system and the other is the new system of education."

"Of course such schemes require other changes in the college set-up, but they can be achieved. Dr. Hoxie is president of a large university that has had the courage to test the American educational system, and he never worried about what is being said."

"The true extent of the Austrian tragedy is not yet apparent. Although we know that the struggle was brewing for many years, the final conflict was unexpected. Even if it was a distinct shock when the Socialists took power in Austria, it was, in the end, inevitable."
