Install New Lights in Library Stacks

Adjustable lights have been placed on the desks in the stacks of the Law Library. It was announced Monday morning. This improvement which was inaugurated to provide better light to the Law Library was done. It will afford better light for those studying in that building.

Lawrentian Plans Exhibition of 35 Photographs

A sale exhibin of 35 of the best photographs, selected from among those exhibited in the fall edition contest sponsored by the Colloquium Club, is now on view in the library. The sale is believed to be only the second in which the works of the student and faculty photographers have been exhibited in the country.

Recommended in the exhibition are all types of photographs, including scientific abstract photos, novel stills and views like compositions, eye - catchers, monochrome, black and white photos, and of the works by the done

The exhibit is open to the public, and all sale proceeds will go toward the purchase of equipment for the camera club activities. Conditions for the sale differ from those of the college's last and only sale, but the sale proceeds will be used to purchase equipment for the club activities.

Unique Tree Is Made Use of in Stage Introduction

"On Borrowed Time" Comes to Rio Theater On December 5

Since time immemorial there have been props in use on the stage, but never has there been one as it will be seen in "On Borrowed Time." The Paul Ostrer comedy which the Rio theater will present on Tuesday evening, Dec. 5th, in association with the legitimate Theatre Corporation of America. Mr. Ostrer had presented things, generally suspended from the roof of the stage, and in imminent danger of being blown over by a hearty breeze or a fierce rain draft. In "Midsummer Night's Dream," although real trees were used, they were of the suspended variety and could scarcely be termed robust enough to perform the functions required of the tree in the play. Thus in "On Borrowed Time" the "tree" had to look like a tree and at the same time support the full weight of a heavy man without the possibility of a total collapse. For you see, in the play, Grimm and Peck, so-called little Liudas, having been granted two wishes, unless they made good fortune by being caught. Bring "Borrowed Time" into the tree, and taking its name, the Princeton Graduate Forests of the "Tree" in this fashion in order to arrive just long enough to kill the plot of Pud's orgish aunt to obtain promotion of him.

In making the tree, the master carpenter hit upon the idea of a robot as a conception, which looked a little like a tree. A realistic appearance of the apparatus was that it would be like the background tree for the tree, giving the tree weight, and enabling it to resist the scruffing influence on it by the wild winds which might cause it to fall from the tree.

Once the composition was created, a system of mechanism had to be devised. A hidden array of motors and mechanisms were used, the total result was a realistic performance that any real uprooted tree could not duplicate.

Finally, in order to provide Mr. Brink (Death) in a position to continue in the course of his mission for as long as possible, a gentleman, who could continue indefinitely.

Thus in "On Borrowed Time" magic of staggering depth solved a tough technical problem and produced a realistic effect, more convincing than actuality.

Comings to Rio

TAYLOR HOLMES

In the Listening Room

This Week

PROGRAM Thursday Day

Program, Saturday afternoon, Dec. 3
3:20 to 4:30 Metropolitan Opera broadcast, "Die Meistersinger" Wagner

Program, Saturday evening, Dec. 3

Busing Named To Second Midwest Conference Team

M O N M O U N T H college placed two players on the all-Midwest Conference football team selected by the nine member coaches, it was announced recently. All nine colleges are represented on either the first or second team as the result of the close voting.

William M. Schade, a six foot four incher, is returning lettermen. His experience at all positions is tremendous, and in spite of this he is improving steadily each practice. Joe Morton and Cape Masterson if his bad leg is strong will be no push-overs. We might be surprised to see him make the open position.

The guard positions are in possession of Bunyan, Smith, Leight, and Hammer. Bunyan will undoubtedly take care of one of those positions andingle light right out for the other. Hammy moved closer to the basket. He is a strong point.

The time out instead of just the new man variables. The guard positions are in possession of the ball handler and is very decisive. His playing is the most affecting play we have seen this fall. It is tender and funny — GEO. M. COHAN.

In this week’s article I am sure to comment for all positions because of the return of a major part of the 1935-36 conference favorites. They urge that as many as possible will stop to attend.
College Is Given Well Preserved Pianoforte Used in 19th Century

An old, but well preserved pianoforte, used during the early 19th century, has been entrusted to the care of Lawrence college from the estate of the late Mrs. John Allen Johnston by her four daughters, Mrs. Paul Zechiel, Miss Lydia Johnston, Mrs. Chester Dunn of Oregon, and Mrs. F. D. Bowditch of Akron, Ohio, all formerly of Appleton. It was announced by President Thomas N. Barney today that the instrument, the first pianoforte in Appleton, carries considerable historical significance as early as 1760 by the distinguished builders, Frederici and Zumpe. The frame is entirely of wood, with no iron braces or supports on in oblong pianos during the 18th century influence of the oblong or square pianos. The frames were considered unsuitable for pianofortes until metal reinforcements began to be used in the first quarter of the 19th century. A six and one-half octave compass was in use by 1811. The compass of a modern piano is slightly over seven octaves.

The pianoforte has three pedals, the customary three or damper pedal, the sostenuto, or soft pedal, and a "cellole" pedal, introduced in 1808. Thus comparing the various parts of the pianoforte including the type and condition of the strings, to the times that each was introduced, Professor Mancini believes the instrument was built approximately 150 years ago.

University of Life
Meets Sunday, Dec. 3

The University of Life will hold its last regular meeting of this semester tomorrow afternoon at 3:30 in the Presbyterian church. Dave Austin will conduct the worship service. Virginia Johnson has charge of the music. Reverend Buly group will conclude its discussion of "Childbirth and Marriage." Mr. Kepler's group will have "The First Ten Per cent of Church Membership." The next meeting will begin at 7 p.m. at the Presbyterian church. Dave Austin will conduct the worship service. Virginia Johnson has charge of the music.

Happy Thanksgiving

DISHING IT

T HIS week we play the little winged god's messenger... "Dear Peg: Will you marry me or must I keep on working? Love, Pete~..."

MARTHA...the MAD...

Diana is again wearing a gray sweater which hides the eighth right in a manner to conceal and to attempt the study of the boys in the stacks... her method of asking "LYDIA" by remote control and a six-belch whistle through the window... has proven too distracting to those who are used to calling Peabody andouting with the telephone.

Speaking of boys... that's a party strong one MALGRAH and the snort transfer from Williams to... he's even learning the bow to shoot his arrows...

The roommates we've known will lend your sweethearts tie or the nut that don't match... in the legend of a great gangster scene... Last night in the first room we've ever heard of a girl give up a boy friend to her roommate... "one night stand"... maybe WINK is in a trusting and... or maybe she carries a space...

People have been planning to... for predictions... as to the fat of HEINRITZ-MARCELLUS... and ideas formulated for a... or... this time because we'd rather...
