Clock Announces Plan for Novel Arena Play

An arena style play, to be given on May 8, 9, 14, 15 and 16 in the Carnegie Hall, is to be presented as a part of the observance of the Lawrence college theater for this year. The director of the play, Theodore Clark anounced the planning of the play, which comes from eight different plays from which scenes have been chosen to be enacted. As far as is known, a production of this type has never been attempted before on campus.

As an arena play was given last spring, it can be assumed that this type will be similar in the number of casts employed at any one time. The play is expected to be a three act drama, the first act of which will be a musical number.

Scenes from eight different plays have been selected for the play. These include "The Woman of Courage" by Bryssen, set in 1862; "The College Widow" by George Bernard Shaw, set in the future; "The Skin of Our Teeth" by Thornton Wilder, which is set in America; and "Red Horses" by Franz Marc, which is set in Germany.

Football to Be Previewed

Oakes, head coach at the University of Wyoming since 1944, replaces Ben Gould, who resigned to take over coaching chores at Colorado college. Hamilin University Institutes

Classics Course Into Program

At Fred, Minn.—[LJ—The present generation is far behind in their knowledge of the literary classics, and the new English course "Catching Up With the Classics," added to Hamlin University's curriculum for the first time this fall, has been offered as a partial outlet for what the students have taught themselves of, according to Dr. T. B. Beyer, recently retired head of the English department. "Catching Up With the Classics" is not meant to be simply another subject for those who wish to avail themselves of it, according to Dr. Beyer. The course is added to Hamline University's curriculum for the first time this fall, "Catching Up With the Classics," in order to give knowledge of the literary classics, and to equip their students to meet the coming conflict between what are loosely known as "communism" and "democracy." This conflict can be done by a process of what we might call "intellectual revolution." This is also a very sound form of "democracy," and "democracy," as the title of the course indicates, is one out between "democracy" and "communism," but for all students who would like to read the best, but who have never previously had the opportunity to read the best, the course will also include lectures from various departments of the university and some outside lecturers.

Libé Hounded by Barking Beasts

Even a hard-working journalist has a sense of humor. Recently one of the students in the lib stacks has taken off her shoes and when the porter comes to removing her to "thar's all that noise is coming from."

To her questioning stance he continued: "The dogs are barking."

Names and works of authors who have written since that time.

The new course was organized by the humanities and social sciences policies committee. Some of the books will be read together in class and others will be read individually and expected on. The course will also include lectures from various departments of the university and some outside lecturers.

L.W.A. Plans Careers Series To Be Held Next Autumn

Opportunities and training for women in careers will be investigated next fall at the first career conference ever held for Lawrence women. Committees are at work preparing a program, pertaining to the day's activities and inviting speakers.

Mary Moran, general chairman chosen by L.W.A., is accompanying Betty Poulsen, Jean Van Benschoten and Phyllis Lawrence, will confer with Miss Wolteringer on Monday. Their plan is similar to a committee that sponsored a similar conference on the University of Minnesota campus last fall. Ideas gleaned from the conference will be utilized as the Lawrence outline.

In charge for the conference come from L.W.A. which heard of identical programs previously carried out on other campuses. Realizing that college women should be better acquainted with openings and limitations in careers and with the specific college backgrounds necessary for preparation, the group decided the conference would meet these needs.

Earlier a petition was circulated among the women students, indicating the majority of their interest lay. From this survey the committee planners will divide the topics for discussion; marriage as a career will be one of the chief topics and others will be chosen. Other discussion topics in the fields will speak both formally and informally.

It is planned to enure all women for classes on the day of the conference, attendance at the program will be required. Ideas gleaned from the conference will be utilized on the University of Minnesota campus.
