Music Notes

BY DAVID M'INTYRE

Benny Goodman is undoubtedly one of the best known and best loved of the world's popular musicians. Few names carry as much prestige in composing, arranging, and performing as that of Benny Goodman can.

Equally at home with either swing or the classics, he is recognized worldwide as one of the best known and best loved clarinet men.

Goodman's first professional appearance was as a 15-year-old clarinet player in a vaudeville act in Chicago when he was only twelve. He learned to play by listening to records of the old Ted Lewis orchestra. At 15 he was playing in settlement house bands for a few months. Benny, along with his brother Harry, got change to play with a group of professional musicians. This experience so inspired Benny that he vowed to make music his life.

Benny and Harry soon organized a small band composed of neighborhood kids, playing vaudeville small dance jobs. At the age of 16 a New York impresario noticed and started him on his career. At a free trial as a small dance job in Chicago, he picked up his clarinet and newly acquired saxophone and migrated to New York. In New York he met and became fast friends with another struggling young musician named Jimmy Dorsey. While moving together they constantly had to contend with free ride over who got the job when the phone rang.

In nineteen thirty-four Benny began to organize his first band, seeking to find young musicians who wanted to work and had new and fresh ideas in their presentation of the music. It was a hard struggle for sixteen-year-old Benny, but in nineteen thirty-seven, the Goodman band contained such names as Harry James, Gene Krupa, Ted Wilson, Lionel Hampton and many others.

Among the top numbers made famous by this group are Don't Be That Way; Sing, Sing, Sing; Blue Skies and One O'Clock Jump. The list of Goodman recordings is long, but each and every one is superb. The music Goodman's name and style have weathered the years and the top selling popular albums today is of a concert presented in Carnegie Hall back in nineteen thirty-eight. A new volume of the top numbers recorded during these years has just recently been released and should show that Goodman is definitely the greatest name in popular music.

Gottfried Noelle Speaks for U. S. Democracy Shown by Elections

BY GOTTFRIED NOELLE

To the whole world known, the decision of the American vote in the presidential elections. The candidate who has brought along towards the newly elected president for his victory and this one will return this thought to who is during the campaign. The time has come again to measure moderate and tolerant words.

We must admit that last weeks were overshadowed by hot other things, let us try to answer from democracy to totalitarianism. In the presidential elections of this year. And this one will return his victory and this one will return his victory and this one will return his victory and this one will return his victory.

The fact that the democratic rights are not only written on the paper but practiced in the U.S. is given expression itself. For they are a basic institution of our political life in the U.S. I am able to learn a bit about the elections as an exciting event in the political life of the U.S. and whatever the future may bring to keep it alive always.

For they are a basic institution of our democracy and whatever we think of the elections or his opponent, he is already a part of our individual right to vote, and a safeguard against the loss of our personal freedom which we cannot accomplish.

Certainly we will never quite succeed in establishing a form of government which is best possible regarding the needs and interests of each individual or of every nation. The translation of ideals in the reality of life will always meet with difficulties. However, in a long period of economic history, it proved to be true that in democracy we have a kind of government which apparently is the best possible in this time and under the existing circumstances.

**Phi Kappa Tau**

Congratulations are in order this week as Phi Kappa Tau was one of the two Theta organizations that went to the Big Ten Wrestle Saturday. The event was a great success, and all members are to be congratulated on their hard work and dedication.

**Trendy Several**

We were told to come out. Good Luck, everyone! A positive end to this chatter. But before we go, let's look back at some of the highlights of last week.

Due to the fact that the communities are attempting to drive religious symbols from schools, there is a larger quantity of icons on the market now than previously. Residences are disposing of their religious objects.

Icons are small and transportable, and are hung in homes and churches to bring happiness. They are divided into blocks like a Sunday paper strip.

In the United States, one of the best collections of icons is at the University of Wisconsin, a gift of Joseph Davies, former ambassador to Russia.

Art historian George H. G. Vikings are Hosts To Mission House In Game On Nov. 25

Seventeen Game Season Opens at Alexander Gym

Coach Forrest "Frosty" Spradwell will open Law-Lawrence college captiv­e action for the first time this season Tuesday night as hosts of Mission House college at Alexander gym.

It will be the end of a rather short preparation period for the inter­eagers and the beginning of a tough game schedule. Following the Mission House contest Tuesday, the Vikings will not play again until December 5, the date of its con­ference opener.

Lawrence has had just two weeks since the final football game to concentrate upon the hard sport. A few of the varsity athletes were not before official workouts did not begin until the end of the football sea­son.

Despite the length of time which Coach Spradwell has had to work with his team, feeling is a little more optimistic than last year. The big reason, of course, is the return of Vike star Bob Ziemer­man, Wayne Boshka, Bob Merid­dith, coach of the Viking cross­country team, and Marshall Pepper, Car­li Athletic director Art Denney.

Despite the length of time which Coach Spradwell has had to work with his team, feeling is a little more optimistic than last year. The big reason, of course, is the return of Vike star Bob Ziemer­man, Wayne Boshka, Bob Merid­dith, coach of the Viking cross­country team, and Marshall Pepper, Car­li Athletic director Art Denney.

Beut Hansen, Charles Ciavuida, Davey Neirner, and Captan Shields were their selection on the Midwest conference's "dream" team. It's a tribute to the Viking team, in Lawrence College, and in the players themselves.

While the championship Lawrence-Cooe football game has been the subject of a great deal of comment during the past two weeks, another change was made in the all-American football quarterbacks, down on the campus news. In fact, it could be one of Lawrence's best seasons this year. Lawrence students each Saturday in Lawrence, will contribute from a fine coach. One more surprise for the Vikings before they get started — their selection on the Midwest Conference's "dream" team. It's a tribute to the Viking team, in Lawrence College, and in the players themselves.

"This year the group will begin work on the Midwest conference, right up until the first weeks of the campaign," said the paper. So, the paper looks like it could be one of Lawrence's best years on the court. There is just one thing which could stop the Vikings before they get started — the sport of a few people who are addicted to tobacco.

The Lawrence College Drive, "Lawrentian 7," was decided upon and following the sports pages closely during the past two weeks may know that the LUC football team opens its 1952 season this Friday night.

And out of that group these may be one or two who realize that smoking is a harmful habit and that it could be one of the best things that the Vikings could do, according to the medical officer and his staff on the effects of smoking Chesterfield cigarettes.

A responsible consulting organization has reported the results of a continuing study of a competent medical specialist and his staff on the effects of smoking Chesterfield cigarettes.

A group of people from various walks of life was organized to smoke only Chesterfields. For six months this group of men and women smoked their normal amount of Chesterfields 10 to 40 a day.

45% of the group have smoked Chesterfields continously from one to thirty years for an average of 10 years each.

At the beginning and at the end of the six-month period each smoker was given a thorough examination, including x-ray pictures, by the medical specialist and his assistants. The examination covered the sinuses as well as the nose, ears and throat.

The medical specialist, after a thorough examination of every member of the group, stated: "It is my opinion that the ears, nose, throat and accessory organs of all participating subjects examined by me were not adversely affected in the six-months period by smoking the cigarettes provided."
