Fred Schroeder Will
Direct Band Dance

January 22 Date
Of Conductor's
First Concert Here

Mr. Fred Schroeder will con-
duct his first band concert at
Lawrence at 8:15 Thursday
evening, January 22, in the.
Dome. Schroeder is the first
time-full-time

'World Affairs'
Is Topic of
Jan. 22 Convoy

Eric Mann to Give
Eye-Witness Report

"World Affairs" will be under-
discussion in the Memorial cham-
nel when Dr. Eric Mann gives his
convocation lecture at 11:06 a.m. next Thursday, Jan. 22.

Dr. Mann will present a pic-
ture of the climate of opinion in
the world today, the political
forces at work, and the state of
"World Affairs." His personal
stories and anecdotes add an
individual contact with the people
of the world. for every member of
his audience.

In the past twenty-five years
Eric Mann has traveled extensively
in almost every country of the
world, traveling closely, and
describing the state of affairs
accurately. His analyses of these
countries, and his contact with the
peoples of these countries, enabled him to
predict the Pearl Harbor attack, as it
occurred on December 7, 1941.

Currently he is the Director, In-
stitute for International Studies and
Professor of Political Science at New
York University, and is taking time from
this position to come here to make this lecture tour.

Dr. Mann was born in Canada. While working as a professor in the Army Special-
corps, he met and married the first American professor to
instruct in German at the University of Paris while
in World War II. He has been a frequent contributor to newspa-
per and magazines in many countries, and has traveled widely. These travels have
led him to the Orient, to South American capitals as well as plank
functions in both of the
United States.

Applications for
Lawrentian Jobs
Will Be Received

Applications for student-clerk, managing editor, business manager and assistant
business manager of the Lawrentian will be received until
Friday, January 22.

Applications for the position of
business manager will be taken by
Mary Kay, business manager, who will
take care of the letter. All replies may be
sent to the Lawrentian office at 800 S. Sage
Hall.

Letters should include a state-
ment of qualifications, a resume of previous
extracurricular activities, and a statement of the
newspaper policy. The Board of
Control of the Lawrentian will
make the final selection.

Notice will be given soon
of minor editorial positions which
will be open.

Workshop
To Feature New Series

During the next two weeks, the Lawrence College Radio WROK will feature a series of programs which will serve to inform the listening public of the weeks and accomplishments of which the fraternities and sororities perform as part of their yearly programs.

The first program on this subject will be presented tomorrow afternoon at 3:15, and will feature Mr. George Walker, dean of men and secretary of the Interfraternity council, who will speak on the activities and aims of the fraternities established on our campus. The "Blue Notes," a column composed of members of the fraternity, will be presented on this program.

The week following, January 25, Barbara Brunnick and George Oetting will present an outline of the work accomplished by the Greek letter societies and members of the Interfraternity council who will speak on the activities and aims of the fraternities.

The "Blue Notes," a column composed of members of the Interfraternity council, will be presented on this program.

Next Semester's Convocation Dates Almost Filled
"The Convocation committee will meet next week to make final plans for the remaining convocations."

George Oetting, committee chairman, reported to the Interfraternity Executive Council members at their meeting last Monday evening. "Most of the dates are set for the outstanding convocations of the year," Oetting pointed out. P. Theodore Clark, professor of drama, is scheduled to address the student body immediately after the production of "Othello." He will interpret various passages of the play and give some of the highlights in the Lawrence theatre production of it.

The committee has been exercising great care in order to select a variety of programs for the rest of the year, Oetting concluded.

Interviews

The former Lawrence theatre lights in the Lawrence theatre! Another major topic concerned the student body immediately after the production of "Othello." He will interpret various passages of the play and give some of the highlights in the Lawrence theatre production of it.

The committee has been exercising great care in order to select a variety of programs for the rest of the year, Oetting concluded.

Interviews

E. Roosevelt
To Lecture at St. Olaf College

Mrs. Eleanor Roosevelt will make a personal appearance in the auditorium of St. Olaf College, Northfield, Minnesota on February 21 to conduct her own personal program. Mrs. Roosevelt has been invited to St. Olaf College by the American Association for Mental Health, an organization which serves the needs of people with mental handicaps and their families. Her visit will focus on the importance of mental health and the role of education and community involvement in promoting mental well-being.

Mrs. Roosevelt will share her personal experiences and insights as a former first lady and daughter of a former president. She will discuss the importance of mental health in society and the need for continued support for those with mental health challenges. Her lecture will be open to the public and will include an open forum for questions and discussion. Attendees will have the opportunity to interact with Mrs. Roosevelt and gain valuable insights into mental health issues.

Alpha Chis
Betes Come To SEC

Monday night marked the first sessions of the SEC experiment of inviting two social groups to each session. Several members of both Alpha Chi Omega and Beta Theta Pi were present. After the SEC members finished the regular business on the agenda, several opinions on various subjects were introduced by the guests.

The subject of some bonds to the Fren or other big dances was placed before the group. Since the bonds for this year have already been contracted, no immediate action can be taken this year. However, sufficient interest was shown in order to have the proposition discussed further in the group meetings.

Another major topic concerned the amount of power the SEC representatives should have to make decisions for the group. The results of the recent poll were discussed in conjunction with this.

Dick Olson, student body president, pointed out that representatives should have full right now; some of the votes this year have already been contracted, no immediate action can be taken this year. However, sufficient interest was shown in order to have the proposition discussed further in the group meetings.

Another major topic concerned the amount of power the SEC representatives should have to make decisions for the group. The results of the recent poll were discussed in conjunction with this.

Dick Olson, student body president, pointed out that representatives should have full right now; some of the votes this year have already been contracted, no immediate action can be taken this year. However, sufficient interest was shown in order to have the proposition discussed further in the group meetings.

Dust, Veteran Photographer, Flew in Okefenokee Mapping

BY MARGARET SCHMANN

Blue-eyed and smiling, he is the kind of lumber they have on their tracts. Infra-red film is sensitive in different shades of gray to the chlorophyll in different types of trees. A lumber expert, with a sharp eye for lichen, of gray, can look at finished enlargements and estimate the trunk sett of each type of tree below.

Flood control measures are planned on the basis of pictures taken at root time. The Abrams Explorers mapped floors Falls, South Dakota, during the height of the most recent flood, and preventive action will be taken in the future.

Most air surveying is not used for such dramatic purposes, though. Cities use aerial views for planning public works and future expansion. Kankakee was one of the towns mapped by the firm last year, but Jim wasn't on that job.

The photographer's main job is an elaborate series of calculations that accounts for the drift of the plane, air speed, altitude, and cloud conditions. He must allow for a 57 per cent overlap between pictures if the grid is to be accurate.

Jim learned his job as an airman in the air force, in North and South Pacific, then from their heads or anything like that.

There was flying saucers over Denver, Jim was a member of a crew that operated at night with a tremendous electronic flash. As the plane flew straight down Commonwealth avenue at 1,000 feet, flashing the powerful light every few seconds, they disappeared, in high hysterics. The Men from Mars landed shortly thereafter at Lowry field on the edge of Denver.

And if Jim Dust is any example of Men from Mars, none of them were autumn sporting any kind of lumber they have on their tracts. Infra-red film is sensitive in different shades of gray to the chlorophyll in different types of trees. A lumber expert, with a sharp eye for lichen, of gray, can look at finished enlargements and estimate the trunk size of each type of tree below.

Old Man Winter Takes Toll; Cupid Takes a Rest

By JINGO

Remember the snow-covered skies and over-anxious bugs. Old Man Winter seems to have gotten the best of the Lawrence student body. Ugly and hard to live with. The Big Club will be glad to bid him to Interfraternity for an encore.

One way to make "Open City" enjoyable is to have a ski team for taking out Marquette in the meet on Sunday. The boys with the bunches get off to a start this week. We feel all kinds of success at La Cosee, tomorrow.

The greatest pledge party ever to be held by the college's drama department to replace Sgt. Joe Friday and his police partners. Toll; Cupid Takes a Rest. Any-one interested can get in touch with Tom Warren, who did a terrific job of putting on the show. He's going to move in cots for "Styles" next week. We elected Mortel, the "Clam of Resistance," as our new president. We should be too, but "Deal me a Card." We will be glad to have back with us again.

...next year who will be expected to see Bink step down from his position as leader of the Infirmary for an annex. Since Nan and Dick want to know what was cut last week, we will ask them to tell us local garage. We collected junk, so you can buy some for your class. After all, not everyone can comprehend such a difficult novels.
Art Exhibits
For January
Now Hanging
Show to Include
Works of Tracy;
Sully Oil Sketches
Three new exhibits of pictures are hanging in the Worcester art center, and will be on view through January.
A group of twenty-four water colors by the Wisconsin Watercolor society; a series of abstract watercolors by Lois Bartlett Tracy; and Robinson Crusoe Oil Sketches by the distinguished American portraitist, Thomas Sully, are being displayed.
The Sully pictures were painted to illustrate an 1861 edition of "Robinson Crusoe" published in London. The oil sketches were originally made for a series of larger paintings which were destroyed by fire. The sketches now are owned by the Museum of Fine Arts of Houston, Texas, and are being circulated under the auspices of the American Federation of Arts.
Sully came to America from England with his actor parents in 1793. As a young painter he was influenced by Gilbert Stuart, the celebrated portrait painter of Revolutionary times. Sully was a sponsor of seven Philadelphia business men to study in London, where he came under the influence of Thomas Lawrence. His best known portrait was that of the young Queen Victoria which show was commissioned by the Society of the Sons of St. George in Philadelphia. He lived in Philadelphia and Milwaukee during the state teachers convention. Lois Bartlett Tracy, whose abstract watercolors are shown in the Wriston room, moved to Florida from her native Michigan as a child, and has made her reputation as a painter of the Florida jungle. One of her landscapes received a gold medal at the World's Fair in New York.

Switchboard Installed
A new, modern Bell Telephone switchboard was installed at the information desk in the administrative office during the Christmas vacation. The board is similar to one formerly in use, but includes small button lights, indicating when an interoffice phone has been picked up for use.

All calls for offices in the administrative and library sections are through the switchboard.

This picture, entitled "Robinson Crusoe and Friday in Their Cove," is the ninth in a series of oil sketches by Thomas Sully, and is now on display in the Art center. Sully completed this work when near the age of 80. It is interesting that, after his death, another picture was found on the reverse side of this one.
Knox Met for Second Time In Conference

Still smarting from the unexpected loss at Ripon last week-end, the Lawrence basketball team, which is at the bottom of the Midwest Conference standing, will be in the Lawrence college gym Tuesday night when they travel to Carleton to face Knox. It will be the second meeting this year between the two teams, Lawrence having lost at Carleton on January 1st.

Since that last meeting between the two teams, Lawrence was outscored 42-50 in the first half of the game, and has since been defeated by Ripon, Kalamazoo and Carleton. Against Ripon, the Vik-

without haste

BY REINDO BROWN

The French are trying some­thing new in their elections. The split of the European unity, M. Schuman, was situated in the last election, for the SEC candidate was elected in the René Mayer’s cab­nit. It is the side-wide move­ment towards more national­ized governments that is typi­fied by the change in France governments.

International cooperation has been somewhat relaxed during the last weeks. The absence of strong leadership of the European Community would allow elections to be held. The recently convened NATO council in Stockholm, Sweden, and the complexity of the questions at hand, are giving the SEC another chance to hold elections.

Outside the French, other nations are also affected. The changes taking place in the Soviet government, for example, could help the SEC to hold elections.

Dr. Ralph Brown of the his­torical section of the French government issued the following note and report: We too think that the SEC leaders should act, since there are many crises in the current situation. They can be placed in the hands of the SEC leaders, and the votes of the people at that time, could be used for the SEC election.

IT PAYS TO BE ELIN BROWN

I earned a cranky social study on the political and economic environment of the SEC, and I recently read an article by the Admira­tion of Science and the Arts, for the SEC.

The tables raised many questions, but none is more important than the question of the SEC leaders who can be trusted with power.

The militarization of a nation is typi­fied by the SEC, who, under the leadership of M. Schuman, is ready to accept the challenge of the SEC leaders.

A “militarization of a nation” is typi­fied by the SEC, who, under the leadership of M. Schuman, is ready to accept the challenge of the SEC leaders.

The SEC leaders are moving ahead to elect their president before the election is over. Their purpose, as we understand it, in making this change was to enable the student body to select their president before the fra­ternities held their elections. The student body was not informed of the change until all the votes of the SEC elections were in order, in order to prevent the students from voting on the elections.
