New Innovations This Year

Lawrentians Return To Changing Campus

College Adds Kiosk To Physical Plant

Real Opportunity

Faculty Scatters Over Globe To Enjoy Instructive Summers

New Student Week is over, and the largest freshman class in eleven years has floated out of the clouds of confusion into the realities of college life.

Three hundred and thirty-five transfers and transfers enrolled last week, reminiscent of the postwar flood of 1947-48. This year, the figure has risen to 4 percent, but was not as high as 11 percent in the top quarter.

Lawrentian authorities were in the student from the following high schools: South Milwaukee, Roselle, Appleton, Neenah, Kewaunee, Fond du Lac, West Bend, Greendale, North Fond du Lac, Bown Lake, Round Lake, Kenosha, and St. Charles, Illinois. Also listed are nine students from Lawrence was chosen this year by several educators for their work. Included in the class are Nancy Ginzorge whose father is professor of law at Yale; Judith Clark whose father is president of Cornell University; Jan and Paul Smuckler whose parents are prominent educators in the United States; Susan Newman whose father is professor of chemistry at Ohio State; Chris Weigert is professor of philosophy at the University of Illinois; and William Black, whose parents are professors at the University of Illinois at Urbana-Champaign.

There are two National Merit Scholars in the class—Hans Mamon of Madison; and Daniel Terrell of Milwaukee. There are also two sets of twins: John and Nancy Von Meter and Norman and Dorte Kegg of Wisconsin, all of Springfield, Illinois.

Summer vacation activities for the Lawrentian college faculty, nearly all of whom were members were many and varied. Nearly all did some teaching and many furthered their education by attending or teaching summer school sessions, participated in professional meetings, or by writing and research projects.

Three faculty members spent the summer in Europe. Professor James C. Stewart of mathematics, for example, bowed to the twentieth century and spent three months in the cities of Europe, including London, Paris, and Rome. Professor James C. Stewart of mathematics was the recipient of a Fulbright Scholarship and spent three months in the cities of Europe, including London, Paris, and Rome.

In addition to the usual summer repair and exterior painting about the campus, a $100,000 repair and exterior painting of the Delta house will be carried out during the summer. All of the basal lawns of the building and all exterior painting and repairs have been completed, which will accommodate all students and faculty members for the next academic year.

New buildings this year include the music-drama center, scheduled for completion by spring. The Lawrence Development Corporation is expected most projects will be completed by next year.

The most obvious novelties are two buildings achieved by the Lawrence Development Fund: the $200,000 fraternity house, built, for the college by the Phi Gamma Delta Fraternity, is ready for occupancy offering a place for members to live together.

The new buildings are in the student campus housing, including an addition that is expected to be completed by spring.

To AN EXPERIMENT

In an experiment, an attempt was made to create a community of undergraduate scholars with new advantages on campus. The experiment included an attempt to create a community of undergraduate scholars with new advantages on campus.

S. A. I. Reorganized

Regents Council now in charge of the activities of the S. A. I. (a separate organization of student engineers) has been reorganized. In addition to the usual summer repair and exterior painting about the campus, a $100,000 repair and exterior painting of the Delta house will be carried out during the summer. All of the basal lawns of the building and all exterior painting and repairs have been completed, which will accommodate all students and faculty members for the next academic year.

New windows for the music-drama center are scheduled for completion by spring. The Lawrence Development Corporation is expected most projects will be completed by next year.

Establish Grant, Memorial Award For Scidmore

Two memorials have been set up on behalf of John Scidmore, Lawrence college senior of Janesville, who died in May after a fall on the campus.

The family of John Scidmore and his fraternity, Sigma Phi Epsilon, have established the John H. Scidmore memorial award, which will take the form of a plaque given each year to a senior man, upon election by his classmates, who displays academic diligence, gives service to campus groups, and shows loyalty to his classmates. It is in lieu of the recognition of the Spencer cup. The Scidmore award will be given on class day in May, 1959, for the first time.

In Scidmore’s home town, Janesville, a memorial scholarship fund has been established, which now totals $1,500. The boy’s parents made the initial contribution to the fund, and his fraternity, Sigma Phi Epsilon, has added several hundred dollars. It will be given each year to a graduate of Janesville high school who will attend Lawrence, and it is hoped that a scholarship of $100 to $200 will be realized annually. A faculty committee of Janesville high school will make the selection on the basis of moral character, need, scholastic record, likelihood of success at college and extra-curricular activities in high school.

A faculty committee of Janesville high school will make the selection on the basis of moral character, need, scholastic record, likelihood of success at college and extra-curricular activities in high school. The fund will be operated as a trust for 25 years; after that time it will be turned over to the college.

Less tars & More taste

DON’T SETTLE FOR ONE WITHOUT THE OTHER. CHANGE TO L*M AND GET ’EM BOTH.

Such an improved filter and more taste! Yes, today’s L*M combines these two essentials of modern smoking enjoyment — less tars and more taste in one great cigarette. L*M’s patented filtering process enables today’s L*M to give you, puff by puff, less tars in the smoke than ever before. And L*M gives you more taste, better taste than any other cigarette.
Vikes Host Roe Tomorrow

The Lawrence College football eleven will face the Wisconsin State College-Stout Blue Devils this Saturday in a non-conference game. For the first time in 25 years, the Blue Devils will play on the Lawrence campus.

The Kohawks are looking for a win after losing the opener to Central Wisconsin. The game will begin at 8:00 p.m. and is expected to be a close contest.

Cross Country Crew Returns In Fine Shape

The Lawrence cross country team returned to the campus a week early this year to begin drills for the forthcoming season. Coach A. C. Denny was quite pleased with the first few workouts. All of the men came back in good condition and it looks like another good season for the hurriers.

There are three junior lettermen this year and with five returning seniors, the team has a good chance to be even better than last.

The returning lettermen are Dave Berganini, the captain of this year's squad. Dave placed tenth in list year's conference meet; Ron Simon, who took 8th placed 33rd in the conference.

The schedule is as follows:
- September 15—Cornell College—here.
- October 1—Coe College—here.
- November 8—Whiting Field—Milwaukee
- November 15—Midwest Conf. Meet—Chicago
- November 18—La Crosse State—here.
- November 25—Ripon College—here.
- December 2—Wisconsin State College-Stout—here.

a word to the wise

BEFORE YOU READ SOMETHING ELSE, let me say, "It's not the editorial written for the benefit of freshmen, I have something else in mind."

I'm NOT going to tell you to get your feet on the ground; too many people have told you that already. I'm NOT going to advise you to decide where you're headed; if you didn't have a pretty good idea, you probably wouldn't be here in the first place.

The theme used in the AUGUST issue to tell you are contradictory - on the surface - but it won't take much pondering to reconcile them.

FIRST OF ALL, the academic side of college is paramount. We all (should) realize that SECOND, never underestimate the importance of a wide range of activities. How do these two statements meet? Well, it's this way...

Knowledge for knowledge's sake is a fine thing, but a book can't teach you how to live with others or how to pick your friends. Studying is a commendable pastime, but it's NOT the only reason you came to college (may the faculty forgive me?)

No matter where your interests lie, whether you lead or follow, Lawrence has a lot to offer you. Such widely scattered activities as the Student Executive Council, the Concert Choir, WLFM, the Art Association, the Lawrentian, Lawrence United Charities and athletics (just to mention a very few), are fields in which you can find a pleasant outlet from your studies.

And incidentally, you benefit from this participation as much as does the school.

ded from the editor's desk

no offset . . .

The old adage "no news is good news" has never applied to the Lawrentian. In spite of many troubles over printing contracts during the summer recess, we're still with you.

An article in the May 23 issue of the Lawrentian stated that "the Lawrentian Board of Control voted to purchase a DJS Verityper, which is an intricate typing machine used extensively in the offset process." This machinery was to be procured over the summer along with an offset printing contract; but the purchase was delayed by financial and ideological obstacles.

It is fervently hoped that the offset "dream" will be realized by the 1959-60 school year, but in the meantime the Lawrentian has signed a one-year contract with the excellent Timmers Printing Co., of Black Creek, Wisconsin.

WELCOME . . .

It's Good to Have You in Appleton . . .

Entirely apart from any business aspects (and, of course, we're not beyond doing business either) but we repeat, entirely beyond this aspect of your residence in Appleton, we want you to know that we sincerely feel that Lawrence College, its staff and its student body add a certain something to our community life that enriches our daily living.
So again, as simply and as humbly as we know how to say it, "WELCOME ABOARD" — it's real good to have you with us.
Drop in to visit and browse whenever you're over our way.
And have a good year!
